

CMRoboBits: Creating Intelligent Robots *Introduction*

Instructors: Manuela Veloso and Brett Browning

TA: Stefan Zickler

15-491, Fall 2007

<http://www.andrew.cmu.edu/course/15-491>

Computer Science Department

Carnegie Mellon

What is a *Robot*?

- Many *robots*...

15-491 CMRoboBits

15-491 CMRoboBits

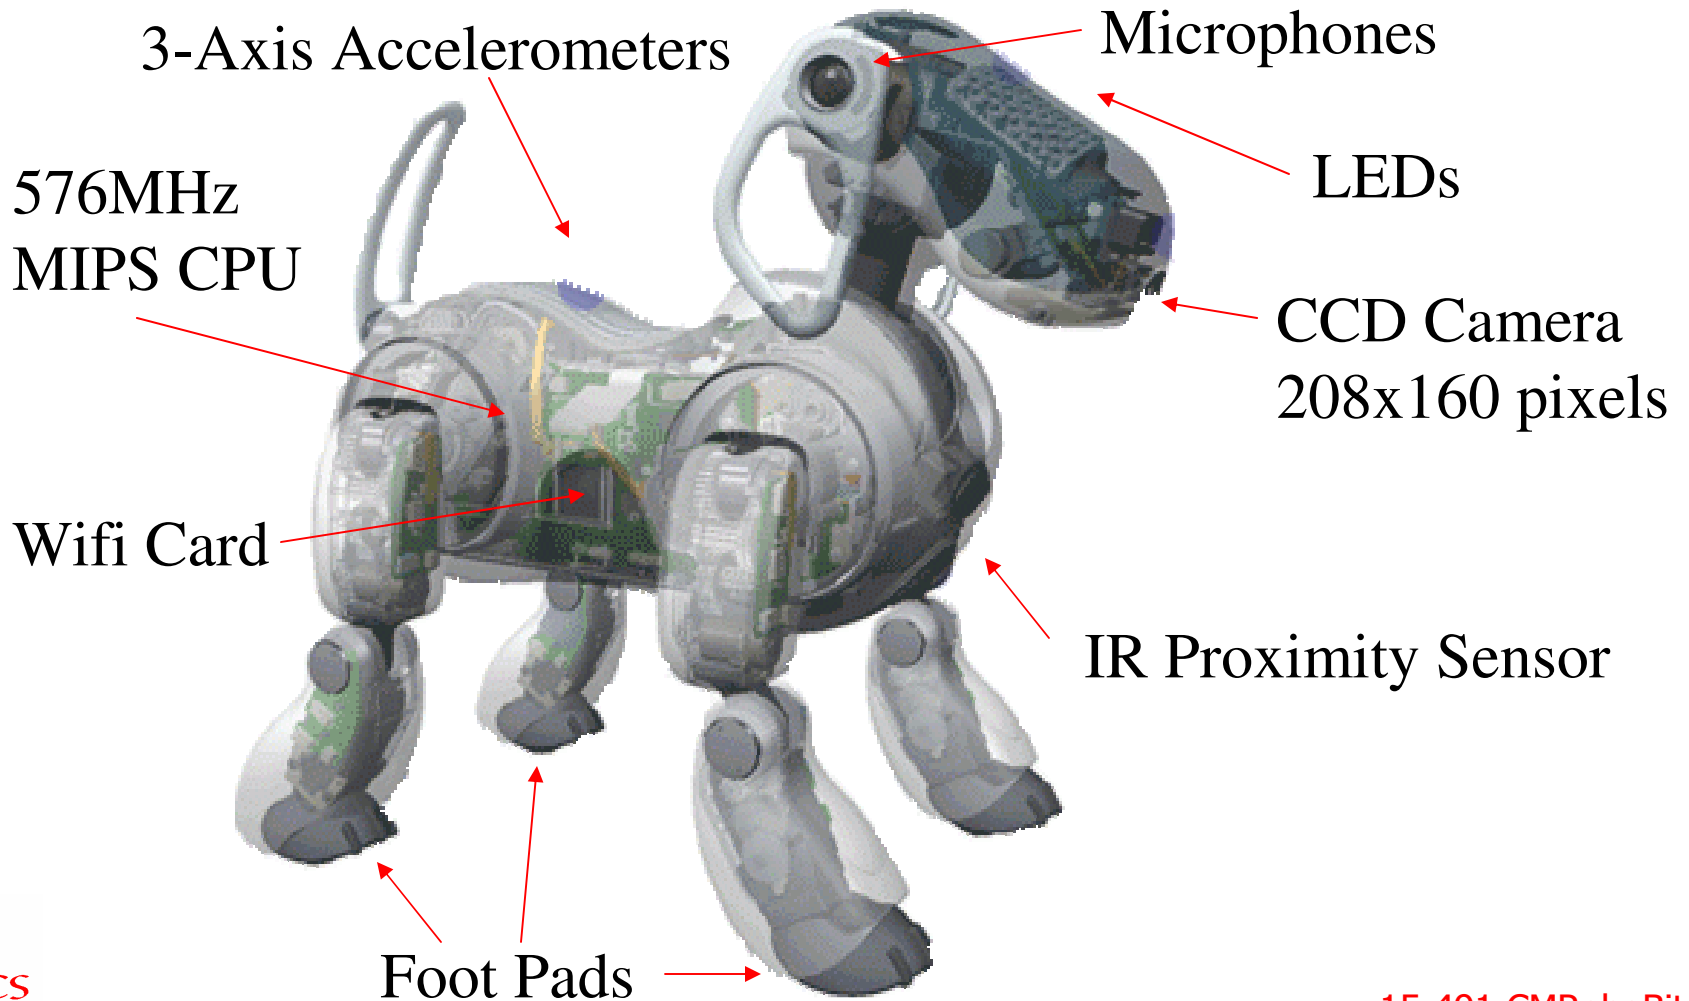

15-491 CMRoboBits

AIBO ERS-7

What is a Robot?

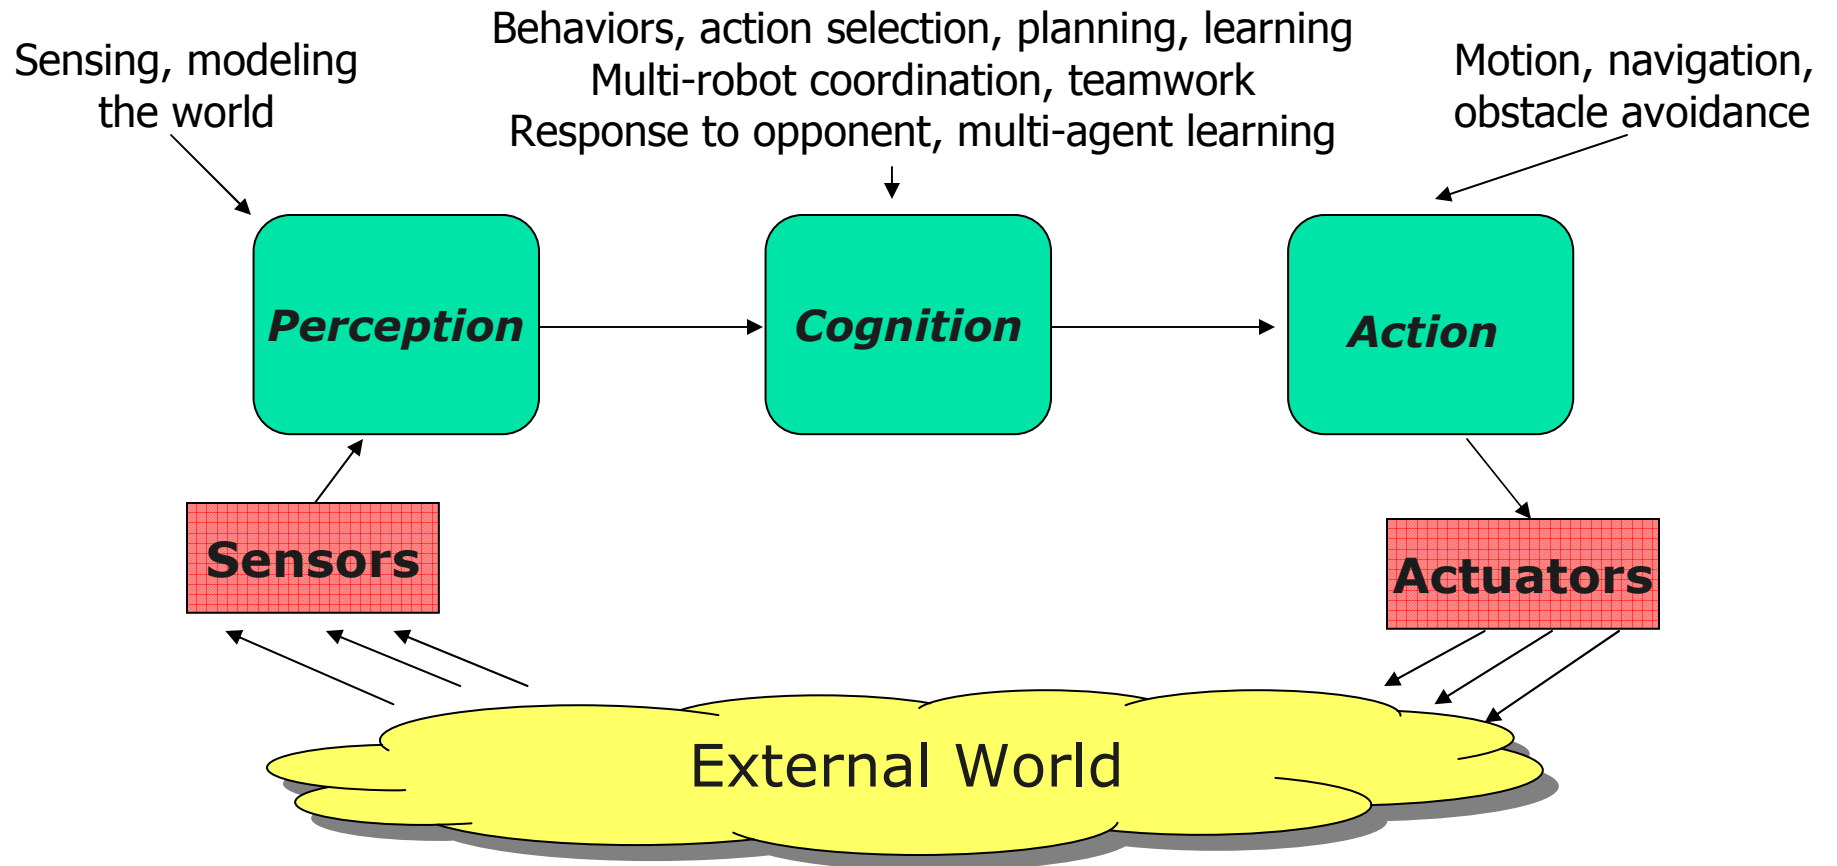

Intelligent Complete Robot

Course Motivations

- Robots are *integrated intelligence*:
 - Sensing & perception
 - Behavior & cognition
 - Learning from the real world
 - Motion & kinematics
 - Multi-robot cooperation & coordination
- Previous courses: AIBO only

RoboCup

“RoboCup is an international research and education initiative. Its goal is to foster artificial intelligence and robotics research by providing a standard problem where a wide range of technologies can be examined and integrated.”

- Simulation (since 1996)
- Small-sized (since 1997)
- Mid-sized (since 1997)
- Legged (since 1998)
- Junior : Soccer, Dance, Rescue (since 2000)
- Rescue (since 2000)
- Humanoid (since 2000)

By the year 2050,
develop a team of
fully autonomous
humanoid robots
that can win
against the
human world
soccer champion
team.

<http://www.robocup.org>

Legged Robots in RoboCup

- Robust hardware - SONY AIBO robots

1999

2001

2003

The CMRoboBits Course

- From robot soccer to making AIBOs accessible to all
- How do you solve problems in “real-time”?
- Sensors are inherently noisy. How do you develop behaviors robust to errors?
- How do you coordinate the actions of multiple robots?

15-491 CMRoboBits

Small-Size Robot Soccer

10 robots + golf ball
5 robots per team
Color markers for ID

Global vision

Offboard
computation

Wireless Link

Robot team is autonomous as a *whole*

CMRoboBits Fall 2007

- Multiple robots
- iRobot Create, www.irobot.com
- Scribbler, www.scribblerrobot.com

Scribbler Demo

Simplest Obstacle Avoidance

```
def main():
    while True:
        L,R = getIR()
        L = 1 - L
        R = 1 - R
        if L and R:
            move(0,0.5)
        elif L:
            move(0.6,-0.5)
        elif R:
            move(0.6,0.5)
        else:
            move(0.6,0)
```

CMRoboBits Schedule 07

- M, Aug 27 – Introduction
- W, Aug 29 – Lab: Robot setup

- M, Sep 3 – Labor’s day – no class
- W, Sep 5 – Lab: Hmw 1 – Scribbler motion modeling

- M, Sep 10 – Robot sensor uncertainty
- W, Sep 12 – Lab: Hmw 2 – MSRS – iRobot

Uncertainty of Robot Actions

- Example: AIBO kicks as planned motions
 - frame-based with kinematic interpolation

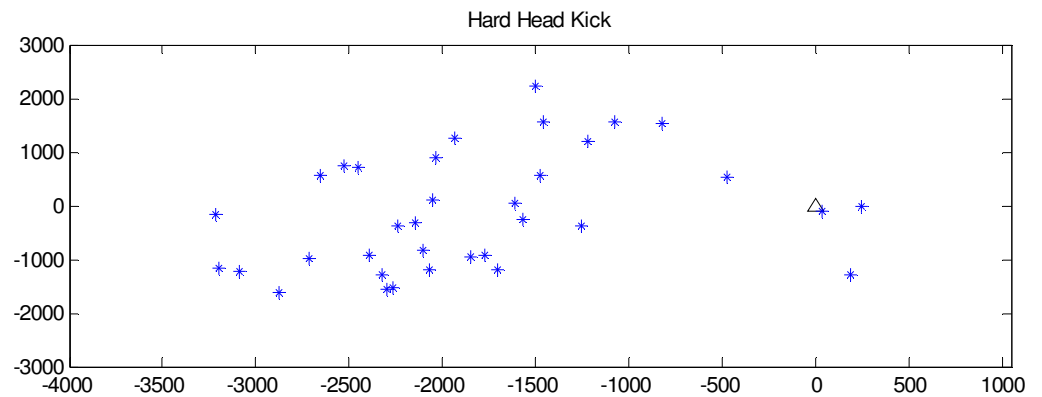

Handling Uncertainty: Model-Based Kick Selection

- Modeling effects of different kicks

- Angle analysis

- Strength analysis

CMRoboBits Schedule 07

- M, Aug 27 – Introduction
- W, Aug 29 – Lab: Robot setup

- M, Sep 3 – Labor's day – no class
- W, Sep 5 – Lab: Hmw 1 – Scribbler motion modeling

- M, Sep 10 – Robot sensor uncertainty
- W, Sep 12 – Lab: Hmw 2 – MSRS – iRobot

CMRoboBits Schedule 07

- M, Sep 17 – Robot behaviors
- W, Sep 19 – Lab: Hmw 3 – Motion, line following

- M, Sep 24 – Robot vision I
- W, Sep 26 – Lab: Hmw 4 – Scribbler and iRobot warmups

- M, Oct 1 – Path planning
- W, Oct 3 – Lab: Hmw 5 – Stationary obstacles

- M, Oct 8 – Robot Vision II – filtering/prediction
- W, Oct 10 – Lab: Hmw 6 – Moving obstacles

CMRoboBits Robots

- AIBOs and ER1-based robots
- Vision

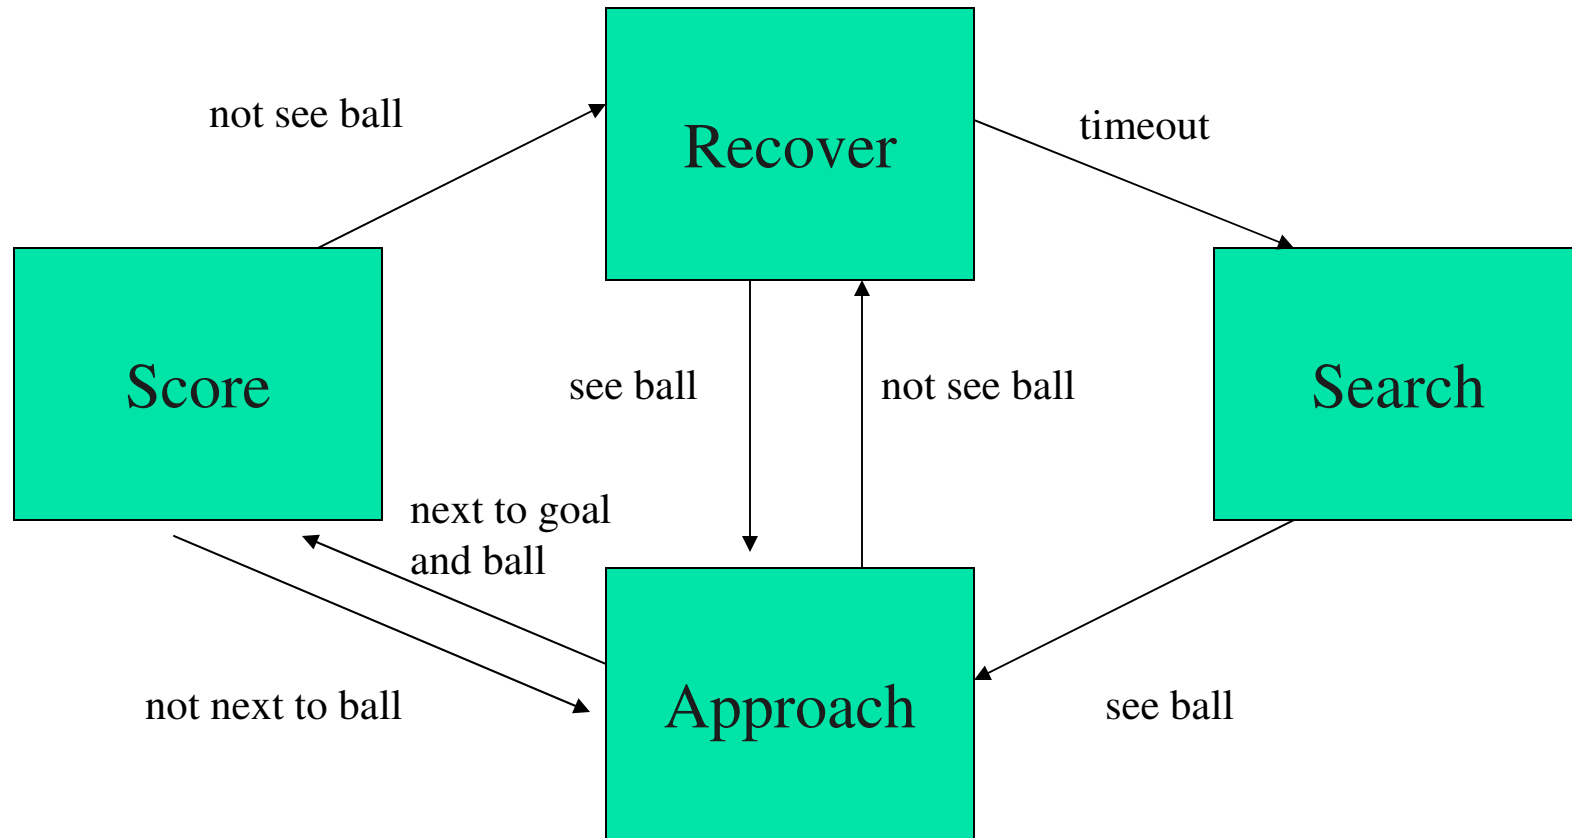

Perception: Vision

- Real-time and robust
- Effective calibration
- Colored blobs identified as objects
- Confidence computed

Cognition: Behaviors

CMRoboBits Schedule 07

- M, Sep 17 – Robot behaviors
- W, Sep 19 – Lab: Hmw 3 – Motion, line following

- M, Sep 24 – Robot vision I
- W, Sep 26 – Lab: Hmw 4 – Scribbler and iRobot warmups

- M, Oct 1 – Path planning
- W, Oct 3 – Lab: Hmw 5 – Stationary obstacles

- M, Oct 8 – Robot Vision II – filtering/prediction
- W, Oct 10 – Lab: Hmw 6 – Moving obstacles

Path Planning

**Find Path to Goal:
concave obstacle**

CMRoboBits Schedule 07

- M, Oct 15 – Multi-robot introduction
- W, Oct 17 – Lab: Hmw 7 – Multi-robot communication

- M, Oct 22 – Multi-robot play coordination and learning
- W, Oct 24 – Lab: Hmw 8 – Plays: definition, switching, and adaptation

- M, Oct 29 – Multi-robot distributed plays
- W, Oct 31 – Lab: Hmw 9 – Maze-based plays

CMRoboBits Schedule 07

- M, Nov 5 – Multi-robot state estimation
- W, Nov 7 – Lab: Hmw 10 – Multi-robot treasure hunt

- M, Nov 12 – Robot Vision III – multi-object detection
- W, Nov 14 – Lab: Hmw 10 – continuation

CMRoboBits Schedule 07

- M, Nov 19 – Multi-robot coordination (Hmw 10 due)
- W, Nov 21 – No class – Thanksgiving – Projects start

- M, Nov 26 – Multi-robot game playing and learning
- W, Nov 28 – Projects

- M, Dec 3 – Course wrap up – project discussion
- W, Dec 5 – Projects

- M, Dec 10 or W, Dec 12 – Final Project Presentation

Action: Motion

AIBO Dance

Ritika Sanghi and Yash Patodia
Final Project
Fall 2003

CMRoboBits : Creating an Intelligent AIBO Robot
Computer Science Department
Carnegie Mellon University

Course Instruction Team:
Prof. Manuela Veloso, Scott Lenser, Douglas Vail,
Dr. Paul E. Rybski, Nicholas Aiwazian, Sonia Chernova

Obstacle Course

AIBO Obstacle Course

**Katie Chang and Ling Xu
Final Project
Fall 2003**

**CMRoboBits : Creating an Intelligent AIBO Robot
Computer Science Department
Carnegie Mellon University**

**Course Instruction Team:
Prof. Manuela Veloso, Scott Lenser, Douglas Vail,
Dr. Paul E. Rybski, Nicholas Aiwazian, Sonia Chernova**

Many Projects

CMRoboBits Schedule 07

- M, Nov 19 – Multi-robot coordination (Hmw 10 due)
- W, Nov 21 – No class – Thanksgiving – Projects start

- M, Nov 26 – Multi-robot game playing and learning
- W, Nov 28 – Projects

- M, Dec 3 – Course wrap up – project discussion
- W, Dec 5 – Projects

- M, Dec 10 or W, Dec 12 – Final Project Presentation

Conclusion

- Working within the perception, cognition, action loop
- Working with multiple robots
- Microsoft Robotics Studio – MSRS

- An exciting course.
