Human Factors in Architecture
Is architecture a science?
How do we make advances in architecture?
What does theory mean in architecture?
How do we create good design?
How much do we need to know?
Can good design be measured?
What is the role of intuition in design?
The role of empirical knowledge?
...our goal is the collaboration with the proletariat in creating a new way of life
THE DEATH AND LIFE OF GREAT AMERICAN CITIES

JANE JACOBS

“Perhaps the most influential single work in the history of town planning...a work of literature.”
—The New York Times Book Review
Annual survey finds average driver wasting 51 hours a year

Jam nation: Study sees longer commutes

Study links sprawling suburbs, sprawling waistlines

By Rob Stein
The Washington Post
The relationship between professional and user needs to be rethought
How do we relate to the concept of function?
How do we understand human behavior and experience?
How do we relate to our environment?
What is the nature of architectural theory?
What is the nature of architectural theory?
