caller id

choose person   choose person and time

categorize family by type of alert?
differentiate fam from outside through ring?
send personalized music? personalize vibrate?
determine real time/ asychronus through alert

to facilitate 80 fam/ 20 outside
family members light up when in use, easy selection process
outside members dont light up, require some sort of programming
limit to outside contacts? only for outside that is practically family?
only can send to other hubs, not individual devices?
