

Widget Design Lamp Switch

Location:
Finger holds are located a further distance, therefore prevents absorption of heat from lamp.

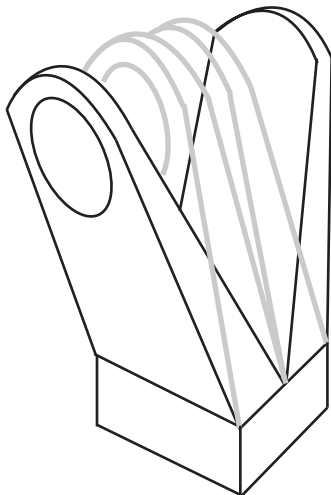

Easy grip:
Two finger indents. No need to grab the body of the lamp.

Shape:
Indicates a squeezing action is needed to turn on and off the lamp switch.

Visual:
When lamp is on the two switches are together, when it is off the two switches are separated.

Auditory:
As the switch is activated it is accompanied by a clicking noise.

Other widgets with similar features:

- binder clips (squeezing action)
- tongs (grip)
- push button on monitor (auditory and tactile response)
