ACKNOWLEDGMENTS
In the 1950s and 1960s there was great hope that the number of

INTRODUCTION
The young Reformers from the north of the state, on the other hand, had a different view of the world. They believed in the power of reason and the importance of individual freedom. The young Reformers were more likely to support the ideas of Thomas Paine, who advocated for the separation of church and state and the rights of the individual.

However, the young Reformers also faced opposition from the Anglican establishment. The Anglican Church was the official church of the state and had a strong influence over the government. The Anglicans were opposed to the young Reformers because they believed in the power of tradition and the importance of the church in society.

In the end, the young Reformers were able to overcome the opposition of the Anglicans and establish a new church in the state. Their ideas would go on to shape the future of the United States, and their legacy would live on for generations to come.
Condorcet
