

**Dr. Qilin Li**  
**Rice University**

<http://ceve.rice.edu/Content.aspx?id=80>

Dr. Qilin Li is an Associate Professor in the Department of Civil and Environmental Engineering and the Department of Chemical and Biomolecular Engineering at Rice University. Dr. Li received her M.S. and Ph.D. degrees in Environmental Engineering from University of Illinois at Urbana-Champaign, and her B.E. degree in Environmental Engineering from Tsinghua University in Beijing, China. She received her post-doctoral training at Yale University and worked as an Assistant Professor at Oregon State University before joining Rice University. Dr. Li's research focuses on advanced technologies for water and wastewater treatment including adsorption, membrane separation, advanced oxidation and environmental nanotechnology, as well as environmental impact of nanotechnology. She currently serves as the chair for the IWA Nano&Water Specialist Committee and the Associate Director for Research of NEWT.
