

Dr. ByongHun Jeon
Department of Earth Resources and Environmental Engineering, Hanyang University, Seoul, Korea.

Byong-Hun Jeon is a professor in the Department of Earth Resources and Environmental Engineering at Hanyang University and a director for Energy Innovation Institute (EI²). Dr Jeon's research interest includes environmental biotechnology using microorganisms for biodegradation of emerging contaminants, wastewater treatment and production of high quality biomass for biofuel production. He is also working on biofuel research using microalgal biomass and food waste feedstocks for the production of biodiesel, biohydrogen, and bioalcohols. His specific goal is to combine wastewater treatment and biofuel generation. Dr. Jeon has filed 28 patents, published more than 150 articles on bioremediation, (waste)water treatment, and biofuel production. He is currently a director for Korean Association of Clean Technology, Korean Society of Groundwater and Soil Environment.
