

Jongha Lee, Ph.D.

Researcher, Institute for Basic Science (IBS), Center for Nanoparticle Research.

Jongha Lee received his B.S. (2010) and M.S. (2012) degrees from the department of Materials Science and Engineering at Seoul National University. He obtained his Ph.D. (2017) from the school of Chemical Engineering at Seoul National University. He is currently a postdoctoral research associate at Institute for Basic Science (IBS).

His research interest is focused on stretchable and biodegradable electronics for biomedical and unconventional optoelectronic applications.
