

Elias Towe is currently the *Albert and Ethel Grobstein Professor* at Carnegie Mellon University in the departments of Electrical and Computer Engineering, and Materials Science and Engineering. He is the Director of the Carnegie Mellon Center for Nano-enabled Device and Energy Technologies. His current research interests are in the general area of photonics, biophotonics, sensors, and nanotechnology.

Professor Towe is the recipient of several awards that include the National Science Foundation Young Investigator Award, the Outstanding Technical Achievement Award from the Office of the US Secretary of Defense, the Commonwealth of Virginia Scholar Award, and the Outstanding Young Faculty Teaching Award (at the University of Virginia). He is a Fellow of the IEEE, the Optical Society of America, the American Physical Society, and the American Association for the Advancement of Science.

Elias Towe was educated at the Massachusetts Institute of Technology, where he earned all his degrees (S.B., S.M. and Ph.D.) from the Department of Electrical Engineering and Computer Science, where he was also a Vinton Hayes Fellow.
