Mark Waugh has had a great test career but it wasn’t always smooth sailing for him. He started off with a fine century on debut against England in 1990-91. However, a couple of years later in SL, he ran into trouble, bagging successive pairs in Colombo and Moratuwa, earning him the temporary nickname “X”. His teammates generously pointed out that had there been another test, he may well have ended up being renamed “Y”. X = ? Y= ?
ANSWER 2

X = Audi
Y = Olympic
In explaining why he chose the nickname X for Y, Leon Lederman said he did so because Y is central to our understanding, and yet so elusive. He jokingly added that a second reason was because “the publisher wouldn’t let us call it Z, though that might have been a more appropriate title, given its villainous nature and the expense it is causing.” X = ? Z = ?
ANSWER 3

X = The God Particle
Y = Higgs Boson
Z = The Goddamn Particle
QUESTION 4

Walpurgis Night (Walpurgisnacht) is a traditional spring festival on 30th April or 1st May in large parts of Central and Northern Europe. Named after the English missionary Saint Walpurga (ca. 710-777/9), it is exactly six months from All Hallows’ Eve and is typically celebrated with dancing and bonfires. According to X, the Ys were once called The Knights of Walpurgis, a play on the word Walpurgisnacht. Y = ?

The characters A and B are based on the minor characters Rosencrantz and Guildenstern, who are messengers whom X outwits and has killed. In Tom Stoppard’s play, *Rosencrantz and Guildenstern are Dead*, they are childhood friends of X, are portrayed as two clowns or fools in a world that is beyond their understanding; they cannot identify any reliable feature or the significance in words or events. Their own memories are not reliable or complete and they misunderstand each other as they stumble through philosophical arguments while not realizing the implications to themselves. The play is structured as the inverse of X; the title characters are the leads, not supporting players, and X himself has only a small part. The duo appears on stage here when they are off-stage in X, with the exception of a few short scenes in which the dramatic events of both plays coincide. Who are A and B?
Timon and Pumbaa
The Lion King 3 is inspired by Stoppard’s play

The adage X is believed to have been coined by English author Edward Butler-Lytton in 1839 for his play *Richelieu; Or the Conspiracy*. The Cardinal's line in Act II, scene II, was more fully:

True, This! —
Beneath the rule of men entirely great
X. Behold
The arch-enchanters wand! — itself is nothing! —
But taking sorcery from the master-hand
To paralyse the Cæsars, and to strike
The loud earth breathless! — Take away the Y —
States can be saved without it!

QUESTION 33

POK erythroid myeloid ontogenic factor is a gene that may act as a master switch for cancer, and is responsible for the proliferation of cancer throughout surrounding cells. The leader of the research team which discovered this, geneticist Pier Paol Pandolfi from the Memorial Sloan-Kettering Cancer Center (MSKCC) in New York City, said the gene is unique in that it is needed for other oncogenes to cause cancer. Discovery of the gene was first published in the January 2005 issue of *Nature*. However, the center ran into trouble by the end of the year regarding their discovery. Why?
The gene name spelt out Pokémon and was most likely a backronym. Nintendo did not want to be associated with a cancer-causing gene and forced the center to change the name of the gene to the less offensive Zbtb7.
