The paper should be submitted by its full title and the full names of all-

**Identification of the Paper**

To find in a submission letter:

1. Information for reviewers, peer reviewers, and potential authors.
2. Why the submission might be included in the journal.
3. The journal's criteria and requirements.
4. The editorial board's decision on the submission.
5. The journal's format and style guide.
6. The journal's submission guidelines.
7. The journal's publication schedule.
8. The journal's contact information.

**The Submission Letter**

- Matching the manuscript package.
- Preparing the submission letter, including all required information.
- Checking the accuracy of the submission.
- Preparing the submission letter for publication.
- Ensuring all information is correct.
- Preparing the final submission for publication.

**Preparing the Submission Letter**

- Preparing the submission letter to accompany the manuscript.
- Preparing the final version of your paper for submission.

**CHAPTER 21**

**Submitting the Paper**
Submitting the Paper to the Journal

Conflicts of Interest

When submitting your paper, please provide a comprehensive list of all potential conflicts of interest that may influence the content of your research. This includes any financial, personal, or professional relationships that could be perceived as biased or influencing your work. Failure to disclose such conflicts may result in the rejection of your manuscript.

Repetitive Publication and Duplicate Submission

The manuscript must not have been published or submitted for publication elsewhere before this submission. If any part of your manuscript has been published or submitted elsewhere, you must disclose this in your submission. If you discover that your submission is identical to an already published manuscript, you should withdraw it immediately and notify the journal.

Selection of the Journal

When selecting a journal, consider the audience, the scope of the journal, the impact factor, and the reputation of the editor. Choose a journal that is well-respected in your field and has a high acceptance rate for manuscripts. Additionally, ensure that the journal is indexed in reputable databases such as PubMed and Scopus.

Description of the Paper

The title of the paper should accurately reflect the main purpose and findings of your research. It should be concise and descriptive, highlighting the most significant aspects of your work. Avoid using abbreviations, acronyms, or jargon that may not be universally understood.

Payment for Manuscript Handling

Dear Editor,

I am writing to request a manuscript handling fee for my article, which I have submitted to your esteemed journal. I understand that the management of manuscripts involves costs, and I am willing to contribute to these expenses to facilitate a smooth publication process.

Attached to this letter is a copy of the manuscript, along with the requested fee, which I have enclosed. I am confident that my article meets the standards of your journal and believe it will make a valuable contribution to the field.

Thank you for your consideration and I look forward to hearing from you soon.

Sincerely,

[Your Name]

Required Submission Forms

If your manuscript is accepted and you wish to submit it for publication, you will need to complete the following forms and submit them with your manuscript:

- Submission Letter
- Manuscript Cover Page
- Manuscript Cover Page, please note that the form must be completed by the author. The cover page should include:
  - Manuscript title
  - Authors' names and affiliations
  - Abstract
  - Keywords
  - Introduction
  - Methods
  - Results
  - Discussion
  - Conclusion

The Manuscript Package

1. A typed, double-spaced submission letter
2. A completed submission form
3. A completed manuscript cover page
4. A completed submission agreement
5. A completed conflict of interest form
6. A completed copyright transfer agreement
7. A completed permissions agreement

What To Include In The Letter

A cover letter should accompany your manuscript and should include:

- A brief summary of the research
- The importance of the research
- The significance of the results
- Any potential applications
- A statement indicating that the research is original

Cost of Color Illustrations

If you have submitted color illustrations, you will be charged a fee of $150 per page for each color illustration. This fee will be included in the final publication cost.

CHAPTER 22

Writing and Publishing in Medicine
What Do Editors Ask of Peer Reviewers?

The peer review process is a key component of maintaining the quality and integrity of research. Editors rely on peer reviewers to provide insightful feedback that helps shape the final publication. Here are some common questions editors may ask their peer reviewers:

- **Effect of the paper on the field**: How does the paper contribute to the existing body of knowledge in the field and what impact is it likely to have?
- **Originality and significance**: Is the research original and do its findings contribute significantly to the field?
- **Technical and methodological soundness**: Is the research methodologically sound and does it use appropriate tools and techniques?
- **Clarity and coherence**: Is the writing clear and does it effectively communicate the research findings?
- **Relevance and applicability**: Is the research relevant to the journal's scope and will it be of interest to the intended audience?
- **Strength of evidence**: How strong is the evidence presented in the paper and how well does it support the conclusions drawn?
- **Relevance to the journal**: Does the research align with the journal's focus and audience?
What Do Editors Do with Peer Reviews?

Editors review a 'blind' manuscript, which means the reviewer does not know who the author is. The reviewers' comments are then sent to the author, who may choose to incorporate the suggestions or not. Editors also make decisions about which papers to accept or reject. This process is designed to ensure that only high-quality research is published.

How Many Reviews Are Asked to Review a Paper?

Each paper is typically reviewed by at least two experts in the field. These reviewers provide feedback on the manuscript, and their comments are used to make decisions about the paper.

How Soon Can You Expect to Receive a Decision?

The time it takes to receive a decision varies depending on the journal and the complexity of the manuscript. Generally, decisions are made within a few weeks, but it can take longer for more complex manuscripts.

Time Needed for Review

The time needed for review can be affected by various factors, including the complexity of the manuscript, the availability of reviewers, and the decision-making process of the journal.

Reflections

Conclusion

Section may be blue is that the editor's point of view. Keep in mind when the paper is revised, do not forget and take a fresh step. The re-revisions could be a reader's point of view and the editor's reflection. In this example, the editor reflects on the paper's structure and content, suggesting improvements for future revisions.

Retaining a Revised Paper

So do the jointed, every corner of your paper can be kept up-to-date. Not only the presentation, but the paper's relevance and the editor's reflections, the decision after revisions, the editor's feedback, and the reader's comments. You can reflect on the paper's development, and the editor's comments, and the reader's feedback. Keep in mind that the paper's introduction, the structure, and the editor's comments, the reader's feedback, and the editor's comments, and the reader's feedback.
Journal of publishing a paper:
Journals now differ widely in when they send to authors the main step in

PRESENT-DAY PUBLICATION PROCEDURES

When preparing acceptance of a paper and its appearance in the published
journal, authors would note the following procedures for publication.

- After the editor sends the proofs, authors should correct any errors.
- The proofs should be corrected, and the final proofs returned.
- The final proofs should be checked, and any necessary changes made.
- The final proofs should be returned to the publisher.
- The publisher will then prepare the final edition of the journal.
