CURRENT APPOINTMENT

Carnegie Mellon University, Pittsburgh, Pennsylvania

Arthur Hamerschlag Career Development Professor of Engineering and Public Policy
Associate Professor, Department of Engineering and Public Policy and Carnegie Mellon University Africa.
Co-Director, Green Design Institute

Areas of expertise: Energy systems for global development, life cycle assessment (LCA), sustainability engineering, environmental management decision tools, energy modeling, environmental impacts of energy systems, energy and environmental policy.

PAST APPOINTMENTS

Carnegie Mellon University Africa, Kigali, Rwanda

Visiting Professor
2016 to 2017

Carnegie Mellon University, Pittsburgh, Pennsylvania

Assistant Professor, Department of Engineering and Public Policy.
2013 to 2016

Carnegie Mellon University, Pittsburgh, Pennsylvania

Executive Director, RenewElec Project.
2010 to 2014

Carnegie Mellon University, Pittsburgh, Pennsylvania

Assistant Research Professor, Department of Engineering and Public Policy.
2010 to 2013

Carnegie Mellon University, Pittsburgh, Pennsylvania

Project Engineer, Green Design Institute, Department of Civil and Environmental Engineering.
2008 to 2010

EDUCATION

Carnegie Mellon University, Pittsburgh, Pennsylvania

Ph.D., Civil and Environmental Engineering. December 2007.

Committee: H. Scott Matthews (co-chair), W. Mike Griffin (co-chair), Chris T. Hendrickson, M. Granger Morgan.

Dissertation Title: Life Cycle Comparison of Coal and Natural Gas for Electricity Generation and the Production of Transportation Fuels.

M.S., Civil and Environmental Engineering. December 2004

Florida International University, Miami - Florida

B.S., Civil and Environmental Engineering. May 2003

RESEARCH GRANTS AND AWARDS

Principal Investigator (Total: \$3.56 million)

1. The National Science Foundation, "Consequential life cycle assessment for novel energy technologies - the case of energy storage." \$299,937. September 1, 2017 to August 31, 2020.
2. The National Renewable Energy Laboratory, "Microgrid project survey research and technical advisory to developers in Africa." \$95,009. September 1, 2017 to July 31, 2018.
3. The National Renewable Energy Laboratory, "Microgrid cost study." \$49,958. June 1, 2017 to July 31, 2018.
4. The National Science Foundation, "Supplemental Funding for RIPS type 2 collaborative research: water and electricity infrastructure in the southeast (WEIS) - approaches to resilient interdependent systems under climate change." \$288,075. January 1, 2016 to December 31, 2017.
5. The National Science Foundation, "RIPS type 2 collaborative research: water and electricity infrastructure in the southeast (WEIS) - approaches to resilient interdependent systems under climate change." \$1,440,425. January 1, 2015 to December 31, 2017.
6. The National Oceanic and Atmospheric Administration, "Climate change and water availability: evaluating and mitigating risks in the electric power sector." \$184,906. August 1, 2014 to July 31, 2017.
7. The Cynthia and George Mitchell Foundation, "Input-Output Analysis and Optimization of Water Use in Texas." \$100,169. October 1, 2014 to April 30, 2016.
8. The Fuels Institute, "Comparative analysis of the economic and environmental impacts of CNG and LNG for the transportation sector." \$152,455. March 15, 2014 to March 14, 2015.
9. The Cynthia and George Mitchell Foundation, "Water supply in Texas: an evaluation of water supply curves." \$101,996. December 2013 to November 2014.

Paulina Jaramillo, Ph.D.

10. National Energy Technology Laboratory, “Power grid reliability implication of environmental regulation and coal plant retirements in systems with large scale penetration of wind power.” \$254,619. January 2013 to December 2014. Co-PIs: Gabriela Hug and Jay Apt.
11. G8 Research Council through the National Science Foundation, “Reduced emission cement: cradle to grave material applications and accounting creating sustainable low-carbon.” \$350,000. September 2012 – August 2015.
12. National Energy Technology Laboratory, “Coal power plant operations in a system with increased wind power.” \$250,000. January 2012 to November 2013. Co-PI: Jay Apt.

Co- Principal Investigator (Total: \$1.36 million)

13. Wilton E. Scott Institute for Energy Innovation and Research at CMU, “Reduced-form risks models for hydropower projects under climate change” \$69,990. January 4, 2018 to June 30, 2019. PI: H. Scott Matthews. Co-PI: Costa Samaras
14. Wilton E. Scott Institute for Energy Innovation and Research at CMU, “Regulatory interactions and unintended environmental impacts in the power generation sector.” \$75,000. January 1, 2015 to December 31, 2015. PI: Jeanne VanBriesen. Co-PI: Costa Samaras.
15. The Fuel Freedom Foundation, “Assessment of comparative economic and environmental impacts of alternative light duty vehicle liquid fuels produced from natural gas.” \$418,000. March 1, 2013 to April 1, 2015. PI: Chris Hendrickson. Co-PIs: Rick Stafford and Mike Griffin.
16. Electric Power Research Institute, “Modeling technology learning for electricity supply technologies: A comprehensive review and recommendations for the EPRI REGEN model.” \$249,052. June 2012 to March 2013. PI: Ed Rubin. Co-PIs: Ines Azevedo and Sonia Yeh.
17. National Energy Technology Laboratory, “Fossil plant mothball and reactivation decisions with increased wind power.” \$250,000. January 2012 to November 2013. PI: Jay Apt.
18. National Science Foundation, “Congestion management to promote sustainability.” \$295,206. August 2010 to August 2013. PI: Chris Hendrickson.

Affiliated

19. Environmental Protection Agency, “Center for Climate, Air, and Energy Solutions.” \$10 million. August 2016 to July 2021. PI: Allen Robinson
20. Steinbrenner Institute for Environmental Research, “Reduced-form risks models for hydropower projects under climate change” Student: Ana Caceres. September 2018 – August 2019.
21. Steinbrenner Institute for Environmental Research, “Assessing the System-Wide Merits of Flexible Carbon Capture and Sequestration Power Plants in Complying with the Clean Power Plan.” Student: Michael Craig. September 2015 – August 2016.
22. Schlumberger Foundation Faculty for the Future Fellowship Program. Student: Sonia Mangones. June 2014 – July 2016.
23. Steinbrenner Institute for Environmental Research, “An analysis of trade-offs of different natural gas consumption pathways.” Student: Fan Tong. September 2013 – August 2014.
24. National Science Foundation Graduate Research Fellowship, “Can controlled charging of electric vehicles reduce the economic and environmental implications of integrating wind power into the electricity grid?” Student: Allison Weis. June 2012 – May 2015.

Gifts

25. ExxonMobil. \$20,000. November 2014.

ADVISING

Current Ph.D. Students

Primary Advisor Role

1. Nyla Khan - Ph.D. candidate, Engineering and Public Policy. *Co-Advisor*: Jay Whitacre. Subject: Material and environmental impacts of large-scale battery deployment for transportation and stationary storage. (2018-present)
2. Joan Nkiriki - Ph.D. candidate, Engineering and Public Policy. Energy for development in a carbon-constrained world. (2018-present)
3. Ana Caceres - Ph.D. candidate, Engineering and Public Policy. *Co-Advisors*: Scott Matthews and Costa Samaras. Subject: Climate-induced risks on hydropower plants in Peru. (2017-present)
4. Jorge Izar – Ph.D. candidate, Engineering and Public Policy. *Co-Advisor*: Mike Griffin. Subject: Food-Energy-Water-Climate nexus. (2016-present).
5. DeVynne Farquharson - Ph.D. candidate, Engineering and Public Policy. *Co-Advisor*: Costa Samaras. Subject: Sustainable energy access. (2015 – present).
6. Michael Roth - Ph.D. candidate, Engineering and Public Policy. Subject: Life extension of existing nuclear power plants in the U.S. (2014-present).
7. Chukwudi Kenechukwu Udeani - Ph.D. candidate, Engineering and Public Policy. *Co-Advisor*: Mario Berges. Subject: Load modeling for newly electrified communities. (2014-present).

Co-Advisor Role

8. Francisco Fonseca – Ph.D. candidate, Engineering and Public Policy. *Primary Advisor*: Mario Berges. Subject: Demand for electricity under climate change. (2015-present)

Ph.D. Thesis Committee Service

1. Aviva Lowe: Tradeoffs in Energy, Water Use, and Cost at Thermoelectric Power Plants. Ph.D. in Engineering and Public Policy. 2018 *Thesis Committee*: Paulina Jaramillo (Chair), Haibo Zhai (co-Chair), Kelly Klima (RAND), and Bart Nijssen (University of Washington).
2. Michael Craig: Economic and Environmental Costs, Benefits, and Trade-offs of Low-Carbon Technologies in the Electric Power Sector. Ph.D. in Engineering and Public Policy. 2017. *Thesis Committee*: Paulina Jaramillo (Chair), Haibo Zhai, Kelly Klima (RAND), Bri-Mathias Hodge (NREL).
3. Sonia Mangones: Impacts on safety and air pollution from transportation policies in Bogotá, Colombia. Ph.D. in Engineering and Public Policy. 2017. *Thesis Committee*: Paulina Jaramillo (Chair), Paul Fischback, Sean Qian, Nestor Rojas (National University of Colombia).
4. Nathan Williams: Microgrid Utilities for Rural Electrification in East Africa: Challenges and Opportunities. PhD in Engineering and Public Policy. Carnegie Mellon University. 2017. *Thesis Committee*: Paulina Jaramillo (Chair), Jay Taneja (UMass), Tim Brown, Eric Hittinger (RIT)
5. Daniel Posen: Fuel, Feedstock, or Neither? – Evaluating Tradeoffs in the use of Biomass for Greenhouse Gas Mitigation. PhD in Engineering and Public Policy; PhD in Civil and Environmental Engineering. Carnegie Mellon University. 2016. *Thesis Committee*: Mike Griffin (Chair), Scott Matthews, Paulina Jaramillo, Costa Samaras.
6. Fan Tong: The Good, the Bad, and the Ugly: Economic and Environmental Implications of Using Natural Gas to Power On-Road Vehicles in the United States. PhD in Engineering and Public Policy. Carnegie Mellon University. 2016. *Thesis Committee*: Paulina Jaramillo (Co-Chair), Ines Azevedo (Co-Chair), Chris Hendrickson, Jeremy Michalek, Sean Qian.

7. Julian Lamy: Optimal Locations for Siting Wind Energy Projects: Technical Challenges, Economics, and Public Preferences. PhD in Engineering and Public Policy. Carnegie Mellon University. 2016.
Thesis Committee: Ines Azevedo (Chair), Paulina Jaramillo, Granger Morgan, Ryan Wiser (LBNL), Wandi Bruine de Bruin (University of Leeds).
8. Shelly Hagerman: Economics of Behind-The-Meter Solar PV and Energy Storage. PhD in Engineering and Public Policy. Carnegie Mellon University. 2016.
Thesis Committee: Granger Morgan (Co-Chair), Paulina Jaramillo (Co-Chair), Jay Whitacre, Michael Dworkin (Vermont Law School).
9. Felipe Faria: Hydropower Development in the Brazilian Amazon. PhD in Engineering and Public Policy. Carnegie Mellon University. 2016.
Thesis Committee: Paulina Jaramillo (Chair), Alex Davis, Ines Azevedo, Sergio Pacca (University of Sao Paulo).
10. Nathaniel Gilbraith: Evaluating how Demand Side Resources Affect the Environmental and Economic Performance of Energy Systems. PhD in Engineering and Public Policy. Carnegie Mellon University. 2015.
Thesis Committee: Ines Azevedo (Chair), Pedro Carvahlo (co-Chair), Manuel Heitor (ITS-Portugal), Paulina Jaramillo, Julia Popova (NYISO).
11. Todd Ryan: Case Studies in the Economics of Ancillary Services of Power Systems in Support of High Wind Penetrations. PhD in Engineering and Public Policy. Carnegie Mellon University. 2015.
Thesis Committee: Paulina Jaramillo (Chair), Gabriela Hug (co-Chair), Mario Berges, Paul Hines (University of Vermont).
12. David Luke Oates: Low Carbon Policy and Technology in the Power Sector - Evaluating Economic and Environmental Effects. PhD in Engineering and Public Policy. Carnegie Mellon University. 2015.
Thesis Committee: Paulina Jaramillo (Chair), Edward Rubin, Cosma Shalizi, Rebecca Nugent, Bri-Mathias Hodge (NREL).
13. Allison Weis: Electric Vehicles and the Grid: Interactions and Environmental and Health Impacts. PhD in Engineering and Public Policy. Carnegie Mellon University. 2015.
Thesis Committee: Paulina Jaramillo (Chair), Jeremy Michalek (co-Chair), Gabriela Hug, Nicholas Muller (Middlebury College)
14. Stephen Rose: Assessing the costs and risks of novel wind turbine applications. PhD in Engineering and Public Policy. Carnegie Mellon University. 2013.
Thesis Committee: Jay Apt (Chair), Paulina Jaramillo, Mitchell Small, John Zack (AWS TruePower).
15. Bryony Laura DuPont: Exploring the Application of an Advanced Extended Pattern Search Algorithm within a Multi-Agent System to Wind Farm Optimization. PhD in Mechanical Engineering. Carnegie Mellon University. 2013.
Thesis Committee: Jonathan Cagan (Chair), Patrick Moriarty (NREL), Paulina Jaramillo, Levent Burak Kara.
16. Yeganeh Mashayekh: Land use and congestion management strategies to promote urban environmental sustainability. PhD in Civil & Environmental Engineering and Engineering & Public Policy. Carnegie Mellon University. 2013.
Thesis Committee: Chris T. Hendrickson (Chair), H. Scott Matthews, Paulina Jaramillo, and Allen Biehler.
17. Aranya Venkatesh: Towards robust energy systems modeling: Examining uncertainty in fossil

fuel-based life cycle assessment approaches. PhD in Civil and Environmental Engineering. Carnegie Mellon University. 2012.

Thesis Committee: Paulina Jaramillo (Chair), W. Michael Griffin, H. Scott Matthews, Jeremy Michalek, and Mitchell Small.

18. Eric Hittinger: Energy storage on the grid and the short-term variability of wind. Ph.D. in Engineering and Public Policy. Carnegie Mellon University. 2012.

Thesis Committee: Jay Apt (Chair), Jay Whitacre, Seth Blumsack, and Paulina Jaramillo.

19. Brandon Mauch: Managing Wind Power Forecast Uncertainty in Electric Grids. PhD in Engineering and Public Policy. Carnegie Mellon University. 2012.

Thesis Committee: Jay Apt (Chair), Pedro Carvalho, Paulina Jaramillo, Paul Fischback, and Marcelino Ferreira.

Master's Research

1. Santiago Amaya: REO-Kiln process for reduced CO₂ emissions from cement manufacturing. M.S. Civil and Environmental Engineering, June to December 2014.
2. DeVynne Farquharson: Analysis of climate metric for use in life cycle assessment. M.A. Energy Science, Technology, and Policy. June to December 2014. Co-advisor: Derrick Carlson.

Undergraduate Research

1. Nikhita Singh: Analysis of changes on the social costs of air pollution from U.S. power plants between 2002-2011. Civil and Environmental Engineering, & Engineering and Public Policy, Summer 2016 to May 2017.
2. Miriam Hegglin: Trade-off analysis of energy efficient lighting technology. B.S. Civil and Environmental Engineering, & Engineering and Public Policy, Summer 2013.
3. Agnes Marszalik and Elissa Goldner: Local economic impacts of a wind energy project in Pennsylvania. B.S. Civil and Environmental Engineering, 2012-2013.
4. Anna Lenhart: A feasibility study of bio-gas digesters and composting systems for Carnegie Mellon University. B.S. Civil and Environmental Engineering, Spring 2011.

Post-Doctoral Researchers

1. Mohsen Rahmani. PhD in Power Systems from Universidade Estadual Paulista (Brazil). Project: Reliability implications of coal plant retirements in PJM. (June 2013 – December 2015). Co-Advisor: Gabriela Hug.
2. Derrick Carlson. PhD in Civil and Environmental Engineering from Carnegie Mellon University. Project: Water supply curves in Texas. (December 2013 – August 2015).

TEACHING EXPERIENCE

Course Instructor

EPP Project - Fall 2013, Spring 2016.

This course is a capstone course for undergraduates majoring in Engineering and Public Policy or Social and Decision sciences. Two faculty members teach this course as an interdisciplinary project in which students analyze a complex “real-world” societal problem involving science and technology. Topics focus on current local, state, or national issues at the intersection of science, engineering, economics, public opinion, and policy. Students must analyze and integrate the various facets of the problem in order to produce useful results that will help a “client” make informed decisions. Results from the project are documented in a final oral presentation and a final written report of professional quality.

Sustainable Energy in the Developing World – Spring 2014, Spring 2015, Fall 2016, Spring 2018.

Paulina Jaramillo, Ph.D.

This course examines the current state of the energy system in developing countries and the challenges these countries will face in sustainably meeting their energy needs in the 21st century. It also offers an introduction to methods available for analyzing energy alternatives, including engineering economics, life cycle assessment, and multi-attribute decision-making.

Decision Making Methods for Engineers and Scientists – Fall 2014, Fall 2015, Spring 2017, Fall 2017, Fall 2018.

This sophomore level course covers various economic, statistical, and decision analysis techniques used for examining complex decisions where technology, society, and policy interconnect. Topics covered include: estimation techniques, benefit-cost analysis, decision trees, dealing with uncertainty, risk perception and analysis, survey design and implementation, utility theory, heuristics and biases in inference and prediction, methods for combining information from different sources and dealing with conflicting objectives.

Program Development and Instructor

Summer Engineering Experience for Girls – 2007-2014

Middle school girls introduced to engineering and its various fields with central focus on energy systems and the environment. Students meet for a two-week period in the summer with faculty and graduate students from various disciplines, includes a research and presentation component.

Green Design Apprenticeship – 2005-2009

Local high school students experience the issues and activities of Green Design engineers and researchers. Students meet one day per month over 5 months to learn about current research areas such as life cycle assessment, environmental impacts of energy consumption and electricity generation, and green building infrastructure.

ACADEMIC AND PROFESSIONAL SERVICE

Editor

- Member of the editorial board for Environmental Research Letters. December 2017 to present.
- Materials for Energy: Energy, Economy and the Environment. MRS Bulletin. Guest editor for the Energy Quarterly, March 2011.

Journal Reviewer

Science; Proceedings of the National Academies of Science; Environmental Science and Technology; Energy Policy; Journal of Industrial Ecology; Wind Energy; International Journal of Sustainable Energy; Journal of the American Medical Association; Applied Energy, Energies.

Non-Journal Reviewer

- EPA STAR Fellowship proposal reviewer. 2015
- NSF Proposal Review Panel – Engineering Directorate. 2013, 2014, 2015, and 2016.
- World Health Organization. Social Determinants of Health Sectoral Briefing Series – Energy: Shared Interests in Sustainable Development and Well-Being. June 2013.
- USDA Small Business Innovation Research Program. February 2013.
- Swiss National Science Foundation. NCCR Pre-Proposal Process. May 2012.
- IPCC: Special Report on Renewable Energy Sources and Climate Change Mitigation. February 2012. Available at: http://srren.ipcc-wg3.de/report/IPCC_SRREN_Full_Report.pdf

University Service

- Non-tenure reappointment and promotion committee. Carnegie Mellon University. 2017-2019
- Diversity Committee. College of Engineering. Carnegie Mellon University. 2017-present

Paulina Jaramillo, Ph.D.

- Curriculum Review Committee. College of Engineering. Carnegie Mellon University. 2017-2018
- Diversity and Communications Committee. Department of Engineering and Public Policy. Carnegie Mellon University. 2017 – present.
- Undergraduate Education Committee. Department of Engineering and Public Policy. Carnegie Mellon University. October 2012 – present.
- Judge for Steinbrenner Undergraduate Environmental Research Award. May 2013 and May 2014.

Conferences and Workshops

- Organizer. Energy for Development in a Carbon-Constrained World (EDC2018). August 2018. London, England
- Scientific committee member. International Symposium for Sustainable Systems and Technology. May 2014. Oakland, CA.
- Contributor. NAS Workshop on the Development of Unconventional Hydrocarbon^[SEP]Resources in the Appalachian Basin. September 2013. Morgantown, WV.
- Organizer. Second Integration and Policy Workshop for the RenewElec Project. October 2011. Pittsburgh, PA.
- Organizer. First Integration and Policy Workshop for the RenewElec Project. October 2010. Pittsburgh, PA.

Other

- Lead Author for Chapter 10 (Transport) of Working Group III for IPCC's 6th Climate Assessment Report. 2018-2022

HONORS AND AWARDS

-
- Recipient of the Dean's Early Career Fellowship. Presented by the College of Engineering at Carnegie Mellon University. Pittsburgh, Pennsylvania. May 2016.
 - Fellow of the Wilton E. Scott Institute for Energy Innovation. Carnegie Mellon University. Pittsburgh, Pennsylvania. April 2018.
 - Fuerza Awardee: 10 Latin@s making a difference in Pittsburgh. Presented by Café con Leche. Pittsburgh, Pennsylvania. August 2015.
 - Recipient of The Outstanding Student Poster Award- 3rd Place. International Society for Industrial Ecology 4th International Conference. Toronto, Canada. June 20, 2007.
 - Recipient of The Teresa Heinz Scholars for Environmental Research Ph.D. Grant. 2006-2007.
 - Recipient of The Teresa Heinz Scholars for Environmental Research Masters Grant. 2004-2005.
 - Outstanding Student Award in Civil Engineering. Spring 2003. Florida International University, Miami-Florida.
 - National Dean's List 2002.
 - Dean's list student during summer 2000 and fall 2001. Florida International University, Miami-Florida.

PROFESSIONAL AFFILIATIONS

-
- Academic Partner, Mini Grid Innovation Lab for Africa. 2017-present
 - Advisor, Carnegie Energy Innovation Initiative. 2018-present
 - Non-resident Fellow, Payne Institute, Colorado School of Mines. 2018-present
 - Faculty Affiliate of the Kigali Collaborative Research Center (Kigali, Rwanda). 2017-present

Paulina Jaramillo, Ph.D.

- Board Member, Life Cycle Sustainability Assessment (LCSA) Section of the International Society of Industrial Ecology (ISIE). 2017-present
- Council Member, US Association for Energy Economics. 2017-present
- Member of the American Chemical Society, the International Society for Industrial Ecology, the U.S. Association for Energy Economics, Tau Beta Pi Engineering Honor Society, Chi Epsilon Civil Engineering Honor Society
