## SKILL

### HIGHLIGHTS

- Practical knowledge of agile software processes such as Extreme Programming (XP) and currently working on Rational Unified Process.
- Knowledge of Software Architectures and Component Based Development.
- Proficient in the use of Together Soft Control Center and working on IBM Rational Suite.
- Experience working in a team as team player and as a team leader.
- Developed applications using c, c++, Java, PHP, Perl.
- Proficient in the use of Java 2 Enterprise Edition (J2EE) and working on Java 2 Micro Edition (J2ME).
- Proficient in the use of Oracle 10g Jdeveloper, Borland Jbuilder, IntelliJ Integrated Development Environments.
- Deployed web applications on Apache Tomcat, JBoss, Oracle 10g, Sun One Application Servers.
- Experience developing under Linux, Windows environments.

## EDUCATION

2001 – Present                      Jawaharlal Nehru Technological University

### **MS in Information Technology with specialization in Software Engineering**

- Currently registered as a full-time student in the MS program.
- Current GPA 8.71/10.00.
- Targeted degree date September 2004.

1998 – 2001                      Osmania University

### **Bachelor of Computer Applications**

- Graduated in May 2001.
- Aggregate of 78 % for the three years.

## WORK

Center for Good Governance

Hyderabad, Andhra Pradesh.

### EXPERIENCE

- Worked in analysis, design and development of E – Governance Applications.
- Initially worked as a team player in the design and development of 3 Applications.
- Lead a team of eight developers in design and development of 2 Applications.

## ACADEMIC LAURELS

- Cash award and Appreciation from the Chief Minister of Andhra Pradesh, Mr. N. Chandra Babu Naidu for the work done in the e-Governance Domain.
- Cash award and Appreciation from the Vice-Chancellor JNT University.
- Introduced Service Oriented Architecture in the e-Governance Domain.
- Was selected as the mentor for the IT Workshop, Linux Fundamentals.

## RELEVANT PROJECTS

### **Project Blossom**

- This project was an effort to introduce Service Oriented Architecture in the E-Governance Domain.
- Developed a reference application where developers of Center for Good Governance used for developing applications based on service oriented architectures.
- Project was developed using Oracle 10g JDeveloper and Visual Studio .NET.
- The reference application demonstrated the communication of J2EE Application with a .NET Application using web services.

### **Project Acumen**

- A J2EE enterprise application to automate key business processes.
- An Open Source Solution provided using Jboss Application Server, Apache Web Server, Postgres Database Server and Linux Operating System.
- Architecture and Design Patterns are consistent with the Sun J2EE Blue Prints and Java Pet Store Reference Application.

### **Electronic Distribution of Examination Papers.**

- A fool proof solution for the Btech examination papers leakage problem at the JNT University.
- The Application handles encryption and decryption of the contents of a CD sent to the engineering colleges by the examination branch of the JNT University.
- The solution is based on Java CryptographyExtension.

## INTERESTS

- Love traveling places.
- Like to participate in technical forums.
- Love to play Shuttle Badminton and Cricket.
