Storytelling - An Ancient Theater Art of All Africa

African theater played an important social and historical role. Men traveled from village to village telling stories and keeping the people informed of events going on in other towns and far away places. A musician often accompanied the storyteller who was also an expert at telling tales based upon legend and mythology; stories that pointed out a moral and usually used animals who thought and spoke as human beings.

Spoken Word Performances
Bare Stage - Platform - Dinner Theater - Church
No Stage Required
