

19-101, Spring 2001

Homework 1

Due 1:30 PM, Friday, Jan. 26, 2001

Problem 1

List four policy decisions that involve information technology, and fit the charter of EPP as discussed in class. Be specific, so that an actual decision is identifiable. For example, "Should the government require that the plastic casings of computers be produced with at least 10% recycled content?" is a good answer. "Environmental problems of computers" is not.

Problem 2

For two of your answers to problem 1, list the relevant stakeholders, the organization or organizations that play an important role in deciding the issue, and those that implement the decision.

Additional homework, that is also due on Jan. 26,
will be handed out in class on Friday Jan. 19.
