D E S K ORANIZER

Jenny Wonf 48-105 | Spring 2013 Studio Instructor: L. Calisti & O. Diler School of Architecture Carnegie Mellon University

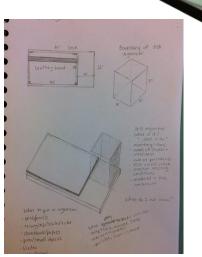

Project Statement

It is difficult for architecture students to have a clean and tidy workstation in their studio resulting the large amount of work that they have to focus on. The purpose of this project is to design a desk organizer that can solve the issue of a messy studio and be mass produced easily. There are several constraints due to the specific site so I designed a desk organizer that met the dimension requirements of the site and the program. My design is based on a mountain terrain and how the area gets smaller on the upper levels.
