(1/27/16)

Proj.1: MARBLE PERFORMANCE - Modeling Surfaces

FINAL SCHEDULE / DEADLINES / DELIVERABLES

DUE Friday Jan. 29, 1:30pm

FINAL MODEL: well crafted, high-performance, fully functioning, well structured paper model. No tape. Careful, minimal use of glue. Well thought out strategy about use of printed lines (avoid dividing the surface into excessive components!)

DRAWINGS: all three 10"x16" drawings, "well-progressed" and printed

EXHIBIT SPACE: organize the exhibit space, group projects by studio (A1, A2, etc...) Put models on your old wood bases, and hang the three drawings behind it. Collaborate. Be DONE by 1:30pm...

DUE Sunday Jan. 31, 5:00pm

FINAL DRAWINGS: Create a single PDF, with each drawing on a separate page.

- Be sure drawings are "flattened" and the file-size is <3Mb... but be sure it prints CLEARLY, crisply
- Filename should be: **48105_S16_lastname_firstname_MarbleMover**
- Upload file to \\archpcserver\Studios\S16_48-105\01 Proj1 Marble Mover

DUE Monday Feb. 1, 1:30pm

VIDEOS: film TWO videos: 1) the paper structure with the marble performance; and 2) the "experience" of flying through your Modelo model, using the variable speed slider to enhance effects.

- Work together as a group to organize and streamline the filming of paper models. Shoot with good lighting, against a black background. Work together
- Capture sound if possible.
- Agree on a file type for all videos: we recommend the .MOV file
- Upload both to \\archpcserver\Studios\S16_48-105\02 Marble Mover Videos

GHOST BLOG: finish composing your blog to explain the entire design process, from first assignment and inspiration, to final model and drawings.

- be sure to update the thumbnail, and to REDUCE the image file size to <500Kb
- avoid upload too many large GIF files... link to Youtube or Pinterest...

** ERASE all the different TAGS from the many assignments, and replace with one tag per project:: #48105_p1

PINTEREST: Be sure all images from Proj.1 are uploaded to your Pinterest site

DUE BEFORE Wednesday Feb. 3, 1:30

GROUP VIDEO: work together as a group to COMPILER the 120 videos (60 paper models + 60 Modelo models) into a single video, upload to YouTube or Vimeo, and share the link with the entire class. See, for example,
