

# ARCH 48 - 125

## Introduction to Digital Media 2

Carnegie Mellon University  
School of Architecture  
Spring 2009

### Rhino Plot Sheet Setup

right click in gray area adjacent to toolbars  
select **default.Page Layout**  
select **New Layout** within **Page Layout** tool bar  
enter **name** for layout  
select **Adobe PDF** as printer  
select **Landscape** orientation  
enter dimensions for sheet size  
set **Initial detail count** to number of viewports [1] as default

double click on drawing sheet to “enter” viewport window  
type in the desired view [top, front, etc.]  
double click outside drawing sheet to “leave” viewport window  
right click on drawing sheet name in upper left corner  
select **scale detail**  
select detail to scale by clicking on viewport frame  
enter **distance on page** [1] by default  
enter **distance in model** to set scale [48 inches for ¼” = 1’-0”]

print sheet as **PDF**  
open pdf in Illustrator

Considerations:

printing a pdf will flatten all layers but retain color information  
assign unique colors to each layer to retain layer control in Illustrator
