

## Mid-Review II

Project II  
Galford Studio  
10 April 2006

- 1/4" building plan
- 1/4" building section through main spaces
- 1/4" principal elevation showing context
- 3/4" wall section through principal wall
- 1/8" building model indicating site moves or separate 1/16" site plan
- freehand sketches that support your idea
- process sketches, process models, supporting diagrams
- coherent verbal presentation of idea-prepare written notes beforehand

Monday is important to review the final development of your concept. It needs to be about production from this point forward. Be able to present the development of your idea in a methodical manner. Explain all your major moves. Verbally and graphically. Think about all the issues we discussed yesterday. Make sure your material choices reinforce your concept. Test your own argument as you present your solution. Be aware of the problems in your scheme, and get feedback from the juror on the issue.
