hepplewhite chairback designs

Basic curvilinear shape.

Three curves are added between the central and intermediate axes.

A curve is added between the intermediate axis and the side border.

hepplewhite chairback designs - basic **forms**

Basic rectilinear shape.

Initial shape.

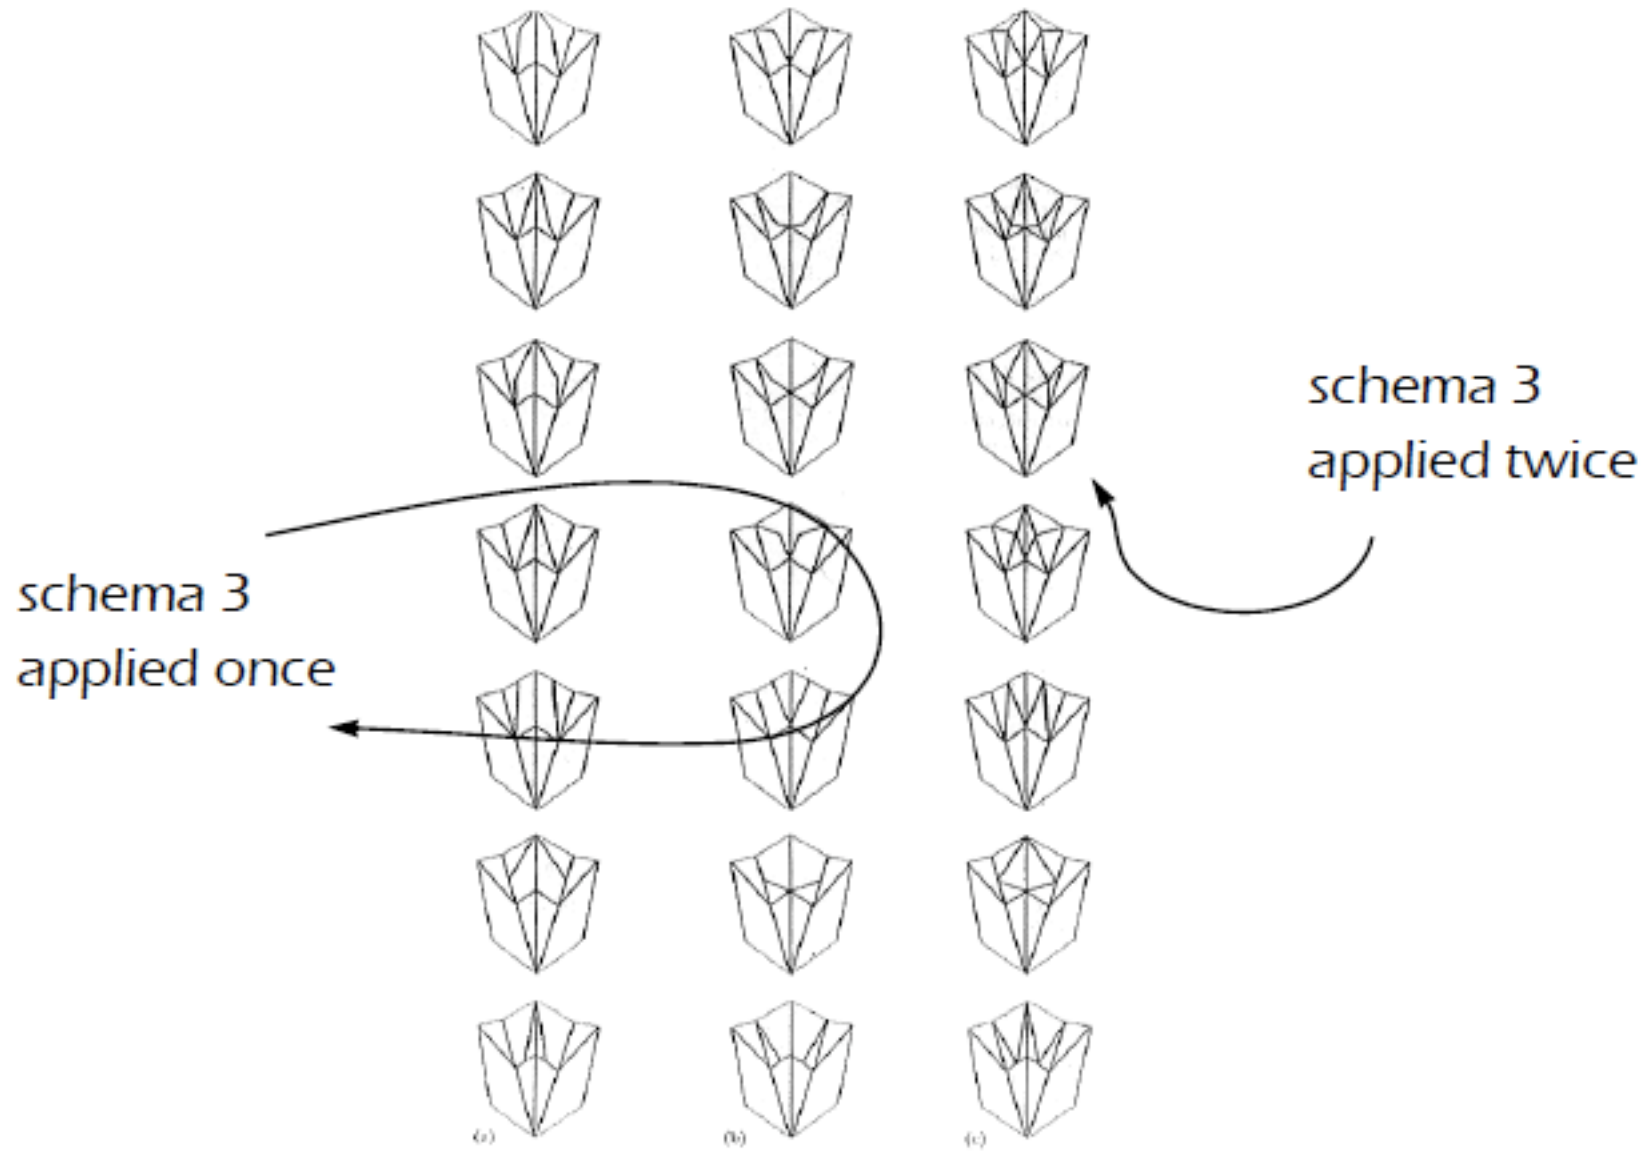

- 4a $(x_0, \{(0, 0): A\}) \rightarrow (x_0, \emptyset)$
- 4b $(x_0, \{(0, 0): B\}) \rightarrow (x_0, \emptyset)$
- 4c $(x_0, \{(0, 0): \bullet\}) \rightarrow (x_0, \emptyset)$
- 4d $(x_0, \{(0, 0): \bullet\}) \rightarrow (x_0, \emptyset)$

Shape rule schemata.

Points $(x,y)_{1,2}$ are
 between 5/8-ths
 and 3/4-ers
 $\theta > 90$

Points $(x,y)_3$ is on
 the top, bottom or
 left hand sides of
 the quadrilateral at
 a fixed distance
 from the end points
 or in the shaded
 part shown

“... we designedly followed the latest or most prevailing fashion only, purposely omitting such articles, whose recommendation was mere novelty, and perhaps a violation of all established rule, the production of whim at instance of caprice, whose appetite must ever suffer disappointment if any familiar thing had been thought of; we say, having regularly avoided those fancies and steadily adhered to such articles only as are of general use and service, one principal hope for favour and encouragement will be, in having combined near three hundred different patterns for furniture in so small a space and at so small a price. In this instance we hope for reward; and though we lay no claim to extraordinary merit in our designs, we flatter ourselves they will be found serviceable to young workmen in general, and occasionally to more experienced ones.”
