Programming in the Arts with Processing

In Class Exercise #14**Day:****Tue 3.10.14****Due:****In Class****Goal:****Array of Strings****Course Web Site:**<http://www.andrew.cmu.edu/course/60-257/>**Assignment:**

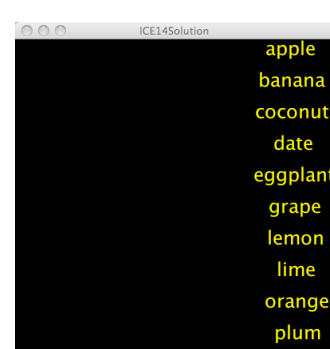

- Create a new Processing sketch and name it ICE14.
- Create an array of 10 Strings and initialize it with an initializer list containing 10 Strings of your own choosing.
- Display the contents of the array in a vertical column with one String on each level.
- Move the vertical column across the window in a wrapping motion.

Typical Expected Output:

```
apple
banana
coconut
date
eggplant
grape
lemon
lime
orange
plum
```

```
apple
banana
coconut
date
eggplant
grape
lemon
lime
orange
plum
```

```
apple
banana
