Lecture 8 Rebasing

Schedule

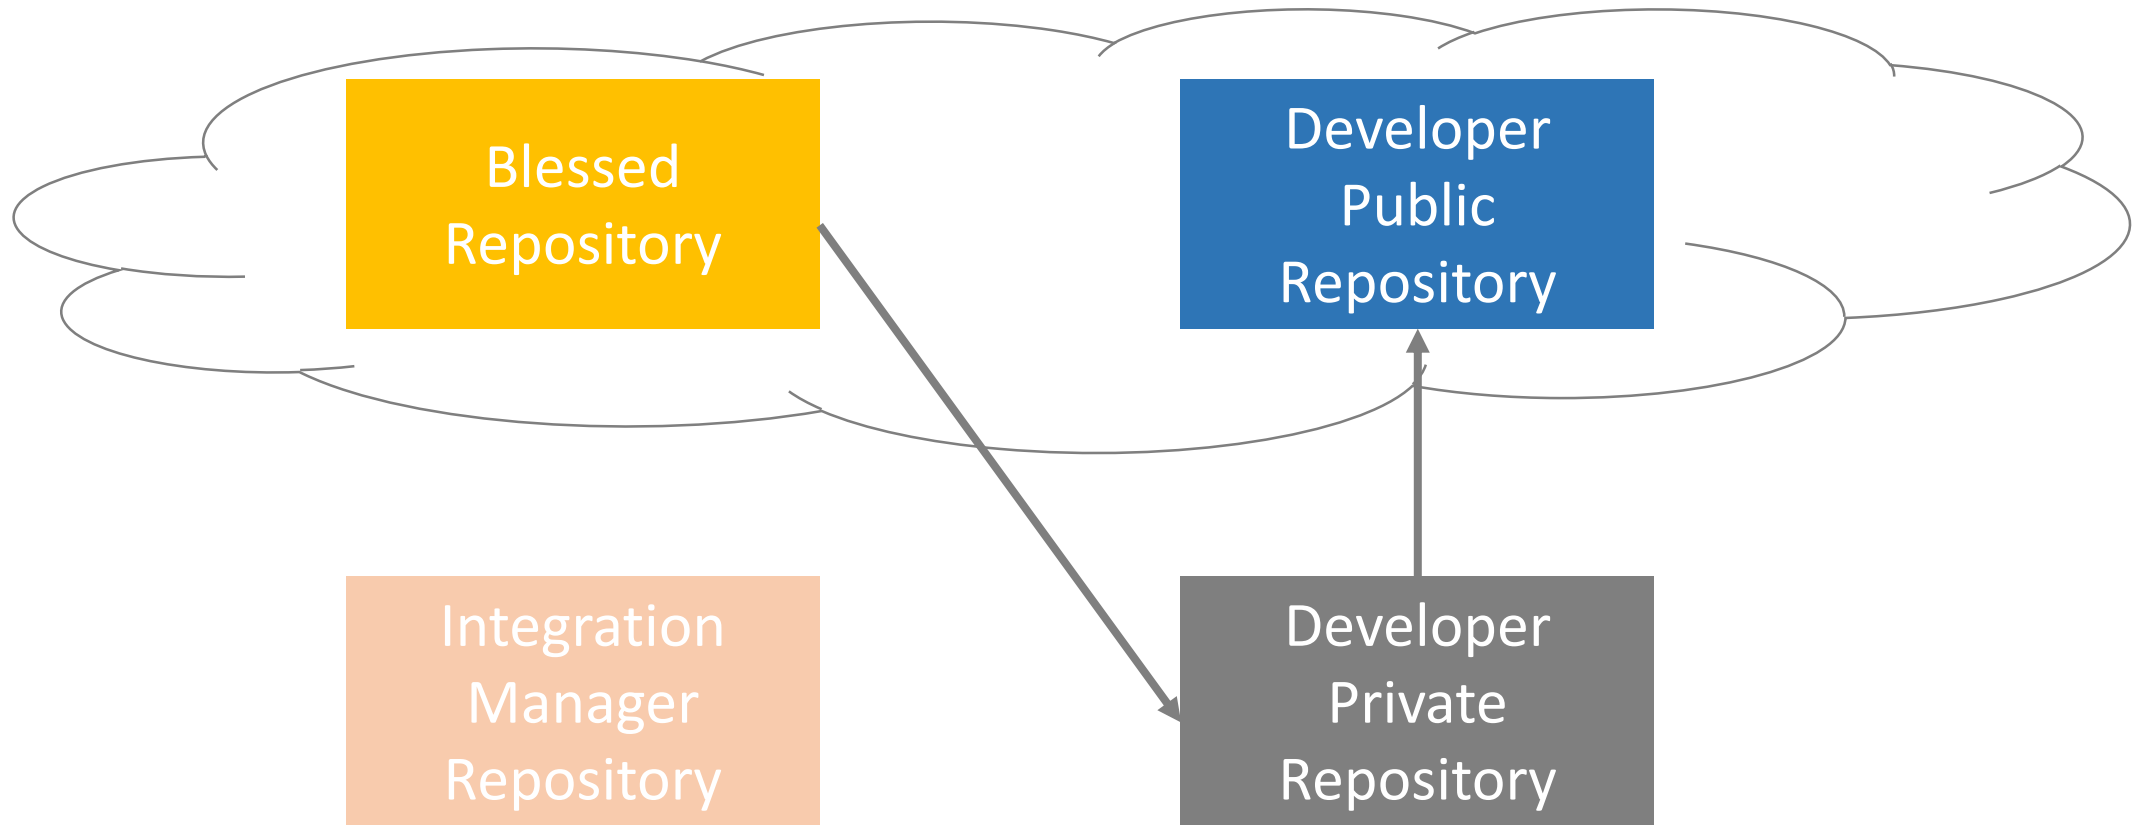

March 29	Rebasing
April 5	When Things Go Wrong
April 12	Visual Git Tools
April 19	Carnival, no class
April 26	Plumbing and Porcealin
May 3	Final

Last Time

- Centralized Workflow
- Integration Manager Workflow

You need to keep your fork up to date

You need to keep your fork up to date

In the private developer repo

```
$ git remote add upstream
```

```
    https://github.com/autolab/Autolab.git
```

```
$ git fetch upstream
```

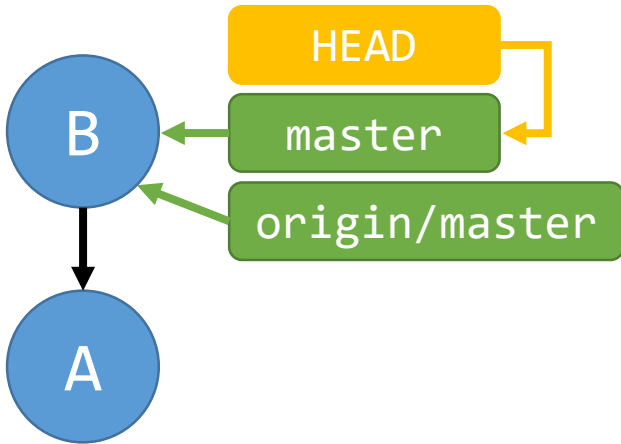

```
$ git checkout master
```

```
$ git merge upstream/master
```

```
$ git push origin master
```

(Sometimes) Need to Get Changes from Master into Topic Branch

1. Ilan Makes a Bugfix

Ilan's Computer

(Sometimes) Need to Get Changes from Master into Topic Branch
1. Ilan Makes a Bugfix

1. `git fetch origin`

Ilan's Computer

(Sometimes) Need to Get Changes from Master into Topic Branch

1. Ilan Makes a Bugfix

1. `git fetch origin`

2. `git merge origin/master`

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

1. `git checkout -b my-feature`
`git commit -m "E"`

Aaron's Computer

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

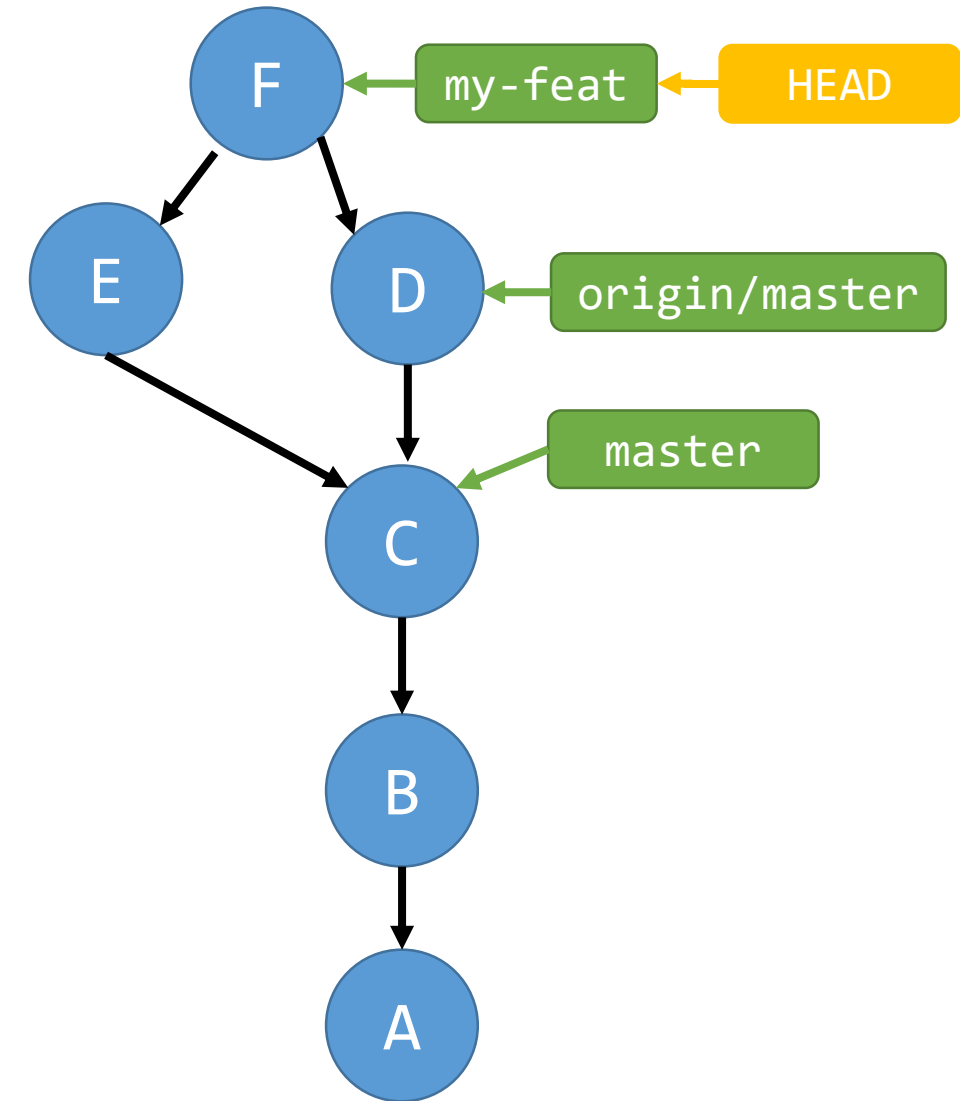

1. `git checkout -b my-feature`
`git commit -m "E"`
2. `git fetch origin`

Aaron's Computer

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

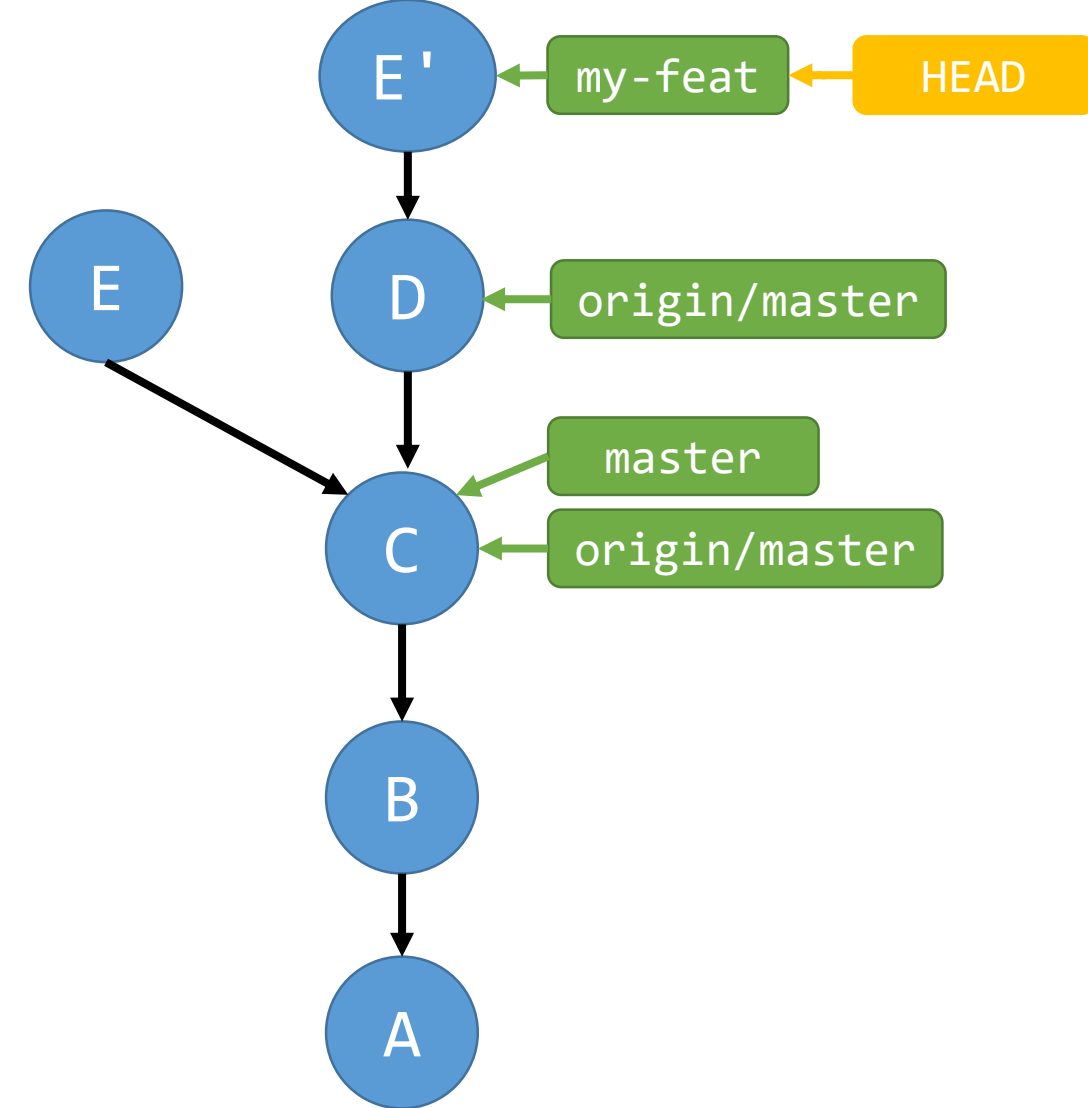

1. `git checkout -b my-feature`
`git commit -m "E"`
2. `git fetch origin`
3. `git merge origin/master`

ewww this sucks!

Aaron's Computer

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

much cleaner!

E' is the same as E but with a different parent

Aaron's Computer

Rebasing

- Rebasing rewrites your git history, replaying the diffs of your commits
- Useful as an alternative to merging when you want to keep history neat

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

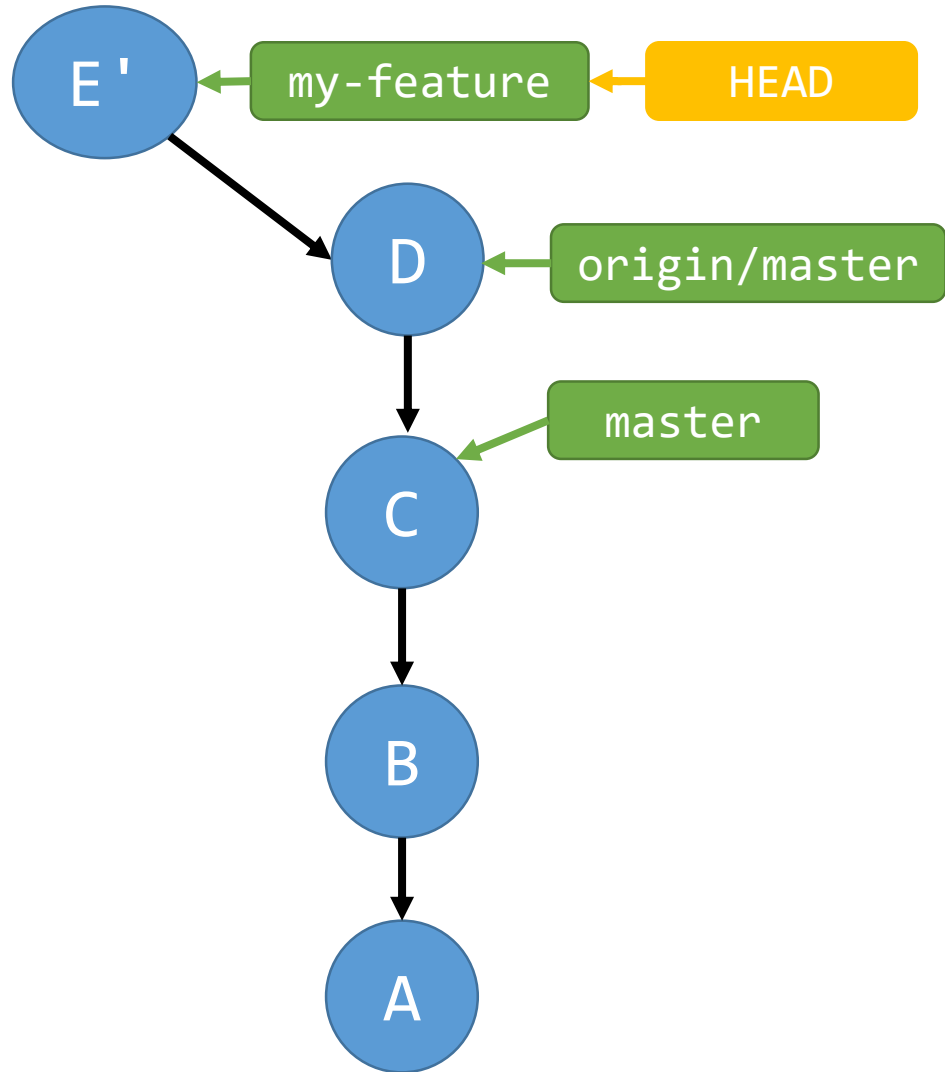

Aaron's Computer

1. `git checkout -b my-feature`
`git commit -m "E"`
2. `git fetch origin`

(Sometimes) Need to Get Changes from Master into Topic Branch

2. Aaron is working on a feature

1. `git checkout -b my-feature`
`git commit -m "E"`
2. `git fetch origin`
3. `git rebase origin/master`

Aaron's Computer

Activity/Homework

Rebase the changes you made a PR for last week on top of the new upstream/master and push to your branch. Your PR should update automatically.

`push -f` (force push)
