

Ming Zhang

Board Director, Wave Photonics

Dr. Ming Zhang is currently board director of Wave Photonics, whose mission is to unleash the full potential of integrated photonics by enabling faster and easier creation of high-performance circuits running on light.

Ming was most recently a Distinguished Architect at Synopsys, driving chiplet technology strategy and new market development at the EDA Group. Prior to working at Synopsys, he was the co-founder and CEO of a Silicon Valley chiplet startup, zGlue. His experience at Intel and at the Samsung foundry both focused on manufacturing process/circuit modeling and robust chip design. He holds a Ph.D. in EE from UIUC and a B.S. in Physics from Peking University. He is passionate about catalyzing agility, customizability, and security of future semiconductors. He stays connected with frontier technologies and markets while advising global VCs and startups.
