Bi-Weekly Status Report [2/13]

1 Major Changes

None

2 What You Have Accomplished Since Your Last Meeting?

Chased down most of the sources of discrepancies between the theoretical model and the simulation - enough to begin work on queue. Single-element queue working and tested in ZSIM. See http://www.andrew.cmu.edu/user/astanesc/AVLtreeresults.png for graphic on AVL tree results.

3 Meeting your milestone

Yes

4 Surprises

No surprises.... yet

5 Looking Ahead

Expand logging capabilities to support measuring the message-passing queue delay time, and expand queue to one full cache line.

6 Revisions

None

7 Resources
