Salad Dressings

The idea of eating a salad every day is a modern nutritional concept; for generations Americans enjoyed eating green onions, radishes, sliced cucumbers, tomatoes and cole slaw...and then vitamins were discovered. Raw vegetables are included in the menu for a number of reasons: their crispness is a pleasant contrast to the soft foods in the meal; their fresh flavor seems to highlight the whole meal; they are usually slightly tart and peppy and perk up the appetite for the foods that are eaten with them, and they are beautiful in color and form and please the sight as well as the appetite.

No matter what kind of salad is being made, it can never be any better than every particle of food and every spoonful of dressing that go into it. The salad material must be chosen for freshness and high quality and prepared with care. The selection of the foods, the care of these foods in the home, their preparation for the salad, the assembly of the ingredients and finally the immediate service, all influence the eye and appetite appeal as well as the vitamin content of salads that are served at your table.

SERVE VEGETABLES WITH A DIFFERENCE Mrs. George Ambrose

EVERY VEGETABLE

Cook until crispy-tender, no longer! If it's canned, heat gently as label directed. Add salt, or Accent, or seasoned salt. Then butter, plus one (1) of the additions listed below.

ASPARAGUS

Cook it quickly in a shallow skillet. Add browned butter, salt and pepper, or snipped chives or slivered almonds. For something delicious slowly heat a 3-ounce package of chive cream cheese. Pour over cooked, drained, hot, asparagus.

BEETS

Try adding grated orange rind, a sprinkle of snipped dill. Wonderful topped with sour cream and horseradish.

BROCCOLI

Top with grated carrot, poppy seeds or sauteed mushrooms. Try gently heating ½ cup sour cream with 2 teaspoons minced onion, I tablespoon milk, dash cayenne pepper. Pour over one package cooked, drained broccoli.

CABBAGE

Use bacon-bits, celery, caraway or poppy seeds, grated cheese, or try adding a little curry powder to melted butter.

CARROTS

Just butter and snipped fresh parsley, bacon bits, grated cheese, oregano, or sauteed green pepper.

CAULIFLOWER

Thinly sliced, it cooks faster. Add slivered dill pickles, grated cheese, or poppy seed. Gently heat 1/3 cup sour cream with I table-spoon milk. Stir in 2 teaspoons chili sauce. Pour over one package hot, drained, cauliflower.

CORN

Off the cob, it is good with a bit of minced onion or green pepper, or slivers of almonds. To one package cooked, drained, whole-kernel corn add 2 tablespoons melted butter and ½ teaspoon curry powder.

GREEN BEANS

Add bacon bits, sauteed mushrooms, slivered nuts. Try cooking to-

203

gether ½ pound green beans, 2 stalks celery (both cut on an angle for nicer appearance), ¼ teaspoon marjoram till vegetables are just tender. Drain, add butter and paprika.

GREEN LIMAS

Any of the old stand-bys — celery, garlic or celery salt, celery seeds, bits of bacon, sauteed mushrooms. Or to a package of cooked, drained limas add 2 tablespoons melted butter and 2 slivered pimentos.

MUSHROOMS

Fresh, canned, or dehydrated they are wonderful with any other vegetable. Or try adding minced onion, lemon juice, or sherry in the melted butter.

ONIONS

Try tiny ones, whole, in sour cream. Or larger ones with snipped parsley in mint. Those bigger ones french fry beautifully—soak in milk for an hour before dipping in batter or frying.

PEAS

Unbeatable with sauteed mushrooms. Wonderful with sour cream or slivered almonds, snipped parsley. Exciting with 2 tablespoons mint jelly melted over one package hot, cooked, drained peas.

POTATOES

Mashed—try adding grated cheese, minced onion or chives, or a little sour cream. Boiled or baked use celery or poppy seeds, sour cream, or crumbled blue cheese.

SWEET POTATOES

Boiled—try grated orange rind or a little honey. Mash a bit of crush-ed pineapple, spoonful of sherry.

SPINACH, OTHER GREENS

Spark with sour cream and horseradish, poppy or sesame seeds, slivered almonds, bacon bits or french dressing.

SQUASH

Regardless of whether acorn or the summer variety, and how it is cooked, try grated cheese or orange rind, chopped chives, bacon bits or sour cream.

TOMATOES

Can stand lots of seasoning and unites well with other vegetables. Thyme, dill or oregano go well with 'plain' (no such thing) tomatoes.

COOKING HINTS

To make a jar of "SPECIAL BLEND" for GREASING PANS for baking, Margaret Zahay combines one-half cup hydrogenated shortening and one-fourth cup flour. This will keep and can be used to grease all pans. Store in refrigerator.

Theresa Stefanovich adds graham cracker crumbs to her CAKE FROS-TING. It adds a pleasant nut flavor.

When the recipe says "Dredge with seasoned flour", DON'T WASTE **FLOUR.** Bernice Reczkowski puts a little in a paper bag, drops in the food and shakes it together thoroughly. The food will be evenly coated and much less flour will be used.

Mixing a CAKE BATTER in the electric mixer? Antoinette Medash slowly decreases the speed when she is ready to lift out the beaters from the bowl; this way the beaters practically clean themselves of the batter.

Patricia Balas tells us that ROLLING DATES or other dried fruit IN FLOUR before cutting will prevent them from sticking to the scissors.

For a delicious TOPPING FOR SPICE CAKE, Betty Burns whips one cup of heavy cream and gradually folds in 1/3 cup apple butter.

FOR A SMOOTHER, CREAMIER FUDGE, Sue Myers adds one teaspoon corn starch to each cup of sugar.

After GRINDING NUTS OR RAISINS, etc., Dorothy Feussner grinds a couple of graham crackers. It adds flavor and cleans out the gringer.

IF YOUR GRAVY IS A LITTLE GREASY, Mrs. Wagner suggesta adding a pinch of baking powder and the grease will disappear.

SOLID FATS ARE STICKY and hard to measure in quantities of less than a cupful. Agnes Maloney uses what the experts call the water displacement method. Suppose your recipe calls for 2/3 cup shortening. Simply fill your measuring cup 1/3 full of cold water, add the shortening piece by piece until the water is just at the one cup mark. Pour off the water and there's your shortening accurately measured and easy to remove from the cup.

Lucy Kuklis tells us CHEESE is EASILY GRATED if you partly freeze it, then it will not stick to the grater.

DON'T RISK SOGGY FRUIT OR PUMPKIN PIES. Dolores Gocek brushes the sides and bottom crust with beaten white of egg, then sprinkles it lightly with flour and proceeds with the filling.

Betty Jabjiniak lets raw potatoes stand in cold water for at least ½ hour before frying to improve the crispness of FRENCH FRIED POTATOES.

Nan Brogan says it's easy as pie to get a FLAKY UPPER CRUST. Just before putting the pie in the oven, brush top crust lightly with cold water. The result will melt in your mouth.

Lettuce to go into the refrigerator should not be wrapped in saran or plastic bags; Charlotte Tancin uses a moistened paper towel, THEN LETTUCE WON'T RUST.

TO REMOVE THE "FISH ODOR" OF TUNA, Emma Grega simply pours boiling water over a sieve containing the chunks of tuna. It will taste very much like chicken when used as a salad or in puffs.

Anne Marie Gallagher suggest using powdered sugar instead of flour when ROLLING AND CUTTING COOKIES. They will be tastier and lighter.

Use your judgement in making SUBSTITUTIONS FOR BUTTER, but the flavor of it in foods is its own reward, says Laura Corazza.

DID YOU KNOW?

EGGS BEAT UP LIGHTER and make finer cake when not too cold. They should be at cool room temperature for best results. When making sponge cakes, especially angel food, remove eggs from refrigerator several hours before using.

It is easiest to SEPARATE WHITES AND YOLKS right after removing eggs from the refrigerator.

TO KEEP EGG YOLKS FRESH for several days, cover with cold water and store in refrigerator.

If you place a paper towel on the bottom of the pot and add I teaspoon salt to the water FOR BOILING EGGS they are less likely to crack.

FIRST - AID FOR THE COOK

ICE — The Wonder Drug In Your Kitchen

When you burn a finger by accidently touching something hot, you want instinctively to cool it immediately. But very likely you have been taught to treat burns with butter or some other oily substance. Not so, says medical science. Ideally, you should put your finger in a bowl of cool water with ice cubes in it. Or you can rub ice directly on the burn until the sting disappears. Not only is the pain relieved, but the finger will heal much more quickly.

Ice has other first-aid uses. It will help stop bleeding and prevent bruising by shrinking blood vessels. This means not only less discoloration, but less swelling, less damage to surrounding tissue, and less pain.

Another advantage of the ice-cube treatment is that it helps to prevent infection. Any part of the body that is refrigerated is less likey to become infected, even if it is contaminated with dirt. The ice-cold temperature keeps germs dormant, unable to multiply and spread. The body's natural defenses can do the rest. When there is a deep wound, if an ice cube can be held against it until a doctor arrives the danger of infection is almost eliminated.

Ice has even been successfully used as first aid in treating emotional disorders. An ice cube held against the neck is usually enough of a "shock treatment" to calm an agitated patient.

When a person gets a heart attack, the doctor sometimes uses morphine to prevent shock resulting from the intense pain. But until the doctor comes, you can relieve pain by gently rubbing an ice cube on the chest. After such treatment, it may even be that the doctor will find it unnecessary to use morphine when he arrives.

A little sliver in the tip of your finger can easily be removed with the point of a needle sterilized in a match flame. If you cannot stand the pain in the sensitive finger tip, place it on an ice cube until it becomes numb. Then the sliver can be pried out with no discomfort.
