Glossary puzzle--Future of the Internet and How to Stop It by Jonathan Zittrain

Captchas	"…a means not to simply copy text, but also to reference it to its original source."
Generativity	"…free of nearly all road signs."
MAPS (Mail Abuse Prevention System)	"…ask users to prove that they are human by typing in, say, a distorted nonsense word displayed in a small graphic."
Skype	"…a system's capacity to produce unanticipated change through unfiltered contributions from broad and varied audiences."
tethered appliances	"…a philosophy of Internet protocol development: '[B]e conservative in what you do; be liberal in what you accept from others.'"
Lo	"…also known as the 'Realtime Blackhole List," referring to the black hole that one's email would enter if one's outgoing email provider were listed."
Postel's Law	"…PC Internet telephony software…"
verkeersbordvrij	"…tech news site…employs a rating system so complex that it attracts much academic attention."
transclusion	"…easy to use, while not easy to tinker with…easy for their vendors to change them from afar…"
digital solipsism	"…identifies times when one person's behavior can give rise to an obligation to another without a contract or other agreement between them…"
law of promissory estoppel	"…each of our PCs experiences when it attaches to the Internet at large, unaware of the size and dimension of the network to which it connects."
Herdict	"…the application designed to run on netizens' PCs to generate and share a collective map of vital signs, that can produce distributed judgments about good code and bad."
acoustic separation	
	"…people may know what the law requires without fully understanding the ramifications for breaking it."
Slashdot	
	"…the first Internet message…"
