

# Similar Triangles

JV Practice 2/9/20  
Lucas Jia / Matthew Shi

## 1 Warm-up Questions

- (AHSME 1995) In  $\triangle ABC$ ,  $\angle C = 90^\circ$ ,  $AC = 6$  and  $BC = 8$ . Points  $D$  and  $E$  are on  $AB$  and  $BC$ , respectively, and  $\angle BED = 90^\circ$ . If  $DE = 4$ , what is the length of  $BD$ ?
- $\triangle ABC$  has  $AB = 12$ ,  $AC = 13$ , and  $BC = 15$ . Points  $X$  and  $Y$  are placed on  $AB$  and  $AC$  respectively such that  $\angle AXY = \angle CB$ . If  $XY = 6$ , what is  $AX + AY$ ?
- Review Law of Sines and Angle Bisector Theorem.

## 2 Similar Triangles, Adding Lines

- (BmMT 2019) In triangle  $ABC$ ,  $\angle ABC = 3\angle ACB$ . If  $AB = 4$  and  $AC = 5$ , compute the length of  $BC$ .

- (Math League HS 1981-1982). The area of square  $ABCD$  is 1. As illustrated at the right, diagonal  $AC$  is extended its own length to point  $E$ . How long is  $BE$ ?

### 3 Sample Problems

- (AMC 10A 2002). Points  $A, B, C, D, E,$  and  $F$  lie, in that order, on  $AF$ , dividing it into five segments, each of length 1. Point  $G$  is not on line  $AF$ . Point  $H$  lies on  $GD$ , and point  $J$  lies on  $GF$ . The line segments  $HC, JE,$  and  $AG$  are parallel. Find  $HC/JE$ .

### 4 Problems

- (2012 AMC 10A) Externally tangent circles with centers at points  $A$  and  $B$  have radii of lengths 5 and 3, respectively. A line externally tangent to both circles intersects ray  $AB$  at point  $C$ . What is  $BC$ ?
- (AMC 10A 2009) Rectangle  $ABCD$  has  $AB = 4$  and  $BC = 3$ . Segment  $EF$  is constructed through  $B$  so that  $EF \perp DB$ , and  $A$  and  $C$  lie on  $DE$  and  $DF$ , respectively. What is  $EF$ ?
- (AHSME 1986) In  $\triangle ABC$ ,  $AB = 8$ ,  $BC = 7$ ,  $CA = 6$  and side  $BC$  is extended, as shown in the figure, to a point  $P$  so that  $\triangle PAB$  is similar to  $\triangle PCA$ . What is the length of  $PC$ ?

- (BMmT 2019) June is making a pumpkin pie, which takes the shape of a truncated cone, as shown below. The pie tin is 18 inches wide at the top, 16 inches wide at the bottom, and 1 inch high. How many cubic inches of pumpkin filling are needed to fill the pie?

5. (AHSME 1990) Let  $ABCD$  be a parallelogram with  $\angle ABC = 120^\circ$ ,  $AB = 16$  and  $BC = 10$ . Extend  $CD$  through  $D$  to  $E$  so that  $DE = 4$ . If  $BE$  intersects  $AD$  at  $F$ , then  $FD$  is closest to what integer?

6. On square  $ABCD$ , points  $E$  and  $F$  are constructed on  $CD$  and  $AB$  respectively such that  $DE = EC$  and  $AF = 2FB$ . Segment  $DF$  intersects  $AE$  and  $AC$  at  $P$  and  $Q$  respectively. If  $AB = 3$ , what is  $PQ$ ?
