Dr. Sang-il Park

CEO

PSIA Corp.

Dr. Sang-il Park is the Chairman and CEO of PSIA, a leading manufacturer of Scanning Probe Microscope (SPM). Earlier, Dr. Park founded Park Scientific Instruments (PSI) in California, where he served as the Chairman and CEO for 9 years. Prior to founding PSI, he worked with Prof. C.F. Quate at Stanford University as a Research Associate.

Dr. Park authored and co-authored numerous research papers, a text book, and fifteen U.S. patents in the field of SPM. He received his Ph.D. in applied physics from Stanford University and his B.S. in physics from Seoul National University.

Currently, Dr. Park is the Director of the National Research Laboratory of Nanoscale Metrology and Analysis. Dr. Park is a member of Nanotechnology Industrialization committee at MCIE, Nanotechnology Information Committee at KISTI, Korean Physical Society, and American Physical Society.
