95-771 Data Structures and Algorithms

Instructor: Michael McCarthy

AI: 95-771 is a Tier 2 Course

Developing Skills with Guided AI Use

Tier 2: Limited cases

Classes in this tier teach field specific skills with attention to professional preparedness, acquired knowledge base and adaptability. GenAI will be restricted to specific assignments or limited in application.

Student Expectations

- GenAI use may change for different assignments (i.e. in-class work versus graded assignments) so careful attention to assignment parameters and instructions is vital.
- Instruction may include acceptable use of GenAI in specific professional circumstances, ethical use guidelines or appropriate forms of citation for GenAI.
- All use of GenAI will require documentation.
- Be sure to cite any use of GenAI on your projects.

You may use LLM's on the following assignments

- Unless stated otherwise, you may use an LLM, such as ChatGPT or Copilot, for:

    - Project assignments (as long as LLM use is cited)

You may NOT use LLM's on the following assignments

- Midterm exams
- Pop quizzes
- Final exam

Academic Integrity Violation

Using ChatGPT or other generative AI outside of these specific guided activities or to generate any other course content will be considered an academic integrity violation.

Ask BEFORE you use AI

If you are unsure if a particular technique or use of AI is allowed, ASK FIRST.
